Case No. 507 – Power Transformers exported from PRC – Statement of Essential Facts

Dear Mr McGovern

Toshiba International Corporation Pty Ltd (TIC) supports the Commission's proposal to terminate the investigation in accordance with 269TDA(13), on the grounds that any injury caused to the Australian industry by exports from China is negligible.

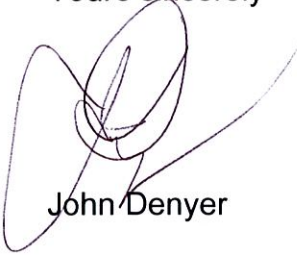

TIC would add that any transformers imported by TIC could not have caused material injury to Wilson Transformer Company given the volume of transformers imported, the size of the transformers, their unique nature, the terms and conditions under which they were supplied and our understanding of the fact that Wilson Transformer Company did not actively compete on a number of these transformers.

TIC however disagrees with the dumping margin determined for exports of power transformers by CTC, and the Commission's determination that CTC was an uncooperative exporter. In TIC's view, CTC was fully co-operative and the data it provided on domestic sales of like goods was verifiable to, and in fact was verified (at the factory visit) to, its audited financial accounts.

TOSHIBA

This view was conveyed to the Commission and TIC is disappointed that the issue was not reconsidered by the Commission as requested by TIC, given the extensions of time granted for publication of the SEF.

Yours sincerely

John Denyer

General Manager, Energy Systems and Solutions

Toshiba International Corporation Pty Ltd
