

Investigation No 507A

Power transformers exported to Australia from the People's Republic of China

Note for file

Notification of an extension of time to issue the Final Report

On 8 October 2021, the Commissioner of the Anti-Dumping Commission (the Commissioner) published Statement of Essential Facts No 507A (SEF 507A) which resumed the investigation into power transformers exported to Australia from the People's Republic of China.¹ SEF 507A followed the Anti-Dumping Review Panel's (ADRP) revocation of the Commissioner's decision to terminate the investigation, as explained in ADRP Decision Nos 122 and 123.²

In SEF 507A, the Commissioner outlined his intention to provide a final report and recommendations to the Minister for Industry, Energy and Emissions Reduction (the Minister) in relation to the investigation on or before 22 November 2021, unless the Commissioner terminates the investigation earlier or requires further time to consider submissions to SEF 507A.

The Anti-Dumping Commission requires further time to consider the implications of Wilson Transformers Company's Full Federal Court matter and to finalise the investigation. In addition, further time is required as a result of the Anti-Dumping Commission's ongoing business requirements.

Accordingly, the Commissioner now intends to provide a final report and recommendations to the Minister on, or before, **23 May 2022**, unless the investigation is terminated earlier.

24 March 2022

¹ With the exception of ABB Chongqing Transformer Co., Ltd, ABB Zhongshan Transformer Co., Ltd, Siemens Transformer (Jinan) Co., Ltd and Siemens Transformer (Wuhan) Co., Ltd.
