A-7 Cost information

1. Complete appendices A6.1 and A6.2 (cost to make and sell) for domestic and export sales.

A-8 Other Factors

1. Complete appendix A7 (other injury factors).

The quantity and prices of imported goods that are subsidised may affect various economic factors relevant to an Australian industry. These include, amongst other things, the return on investment in an industry, cash flow, the number of persons employed and their wages, the ability to raise capital, and the level of investment in the industry. Describe, as appropriate, the effect of subsidised imports on these factors and where applicable use references to the data you have provided at appendix A7 (other economic factors). If factors other than those listed at appendix A7 (other economic factors) are relevant, include discussion of those in response to this question.

A-9 Injury Claims

1. Please provide a statement setting out whether you support or oppose revocation of the anti-dumping measures in the form of the countervailing duty notice. If you oppose revocation of the anti-dumping measures in the form of the countervailing duty notice, provide evidence addressing whether, in the absence of measures, subsidised imports would cause material injury to the local industry producing like goods.

Your response should consider:

1. Information on market trends for the goods in question, addressing in particular, in the absence of the countervailing measures as they relate to EverPress Aluminium Industries Sdn Bhd, the:
 - i. Effects on volume and value of imports and sources of imports
 - ii. Effects on price
 - iii. Effects on sales and market shares
 - iv. Effects on key performance indicators such as:
 - a. profits,

FOR OFFICIAL USE ONLY / PUBLIC RECORD

- b. price trends,
 - c. investment, and;
 - d. employment.
2. Information addressing the likelihood of material injury occurring to the Australian industry in the absence of the anti-dumping measures (in particular, in the form of the countervailing duty notice as it relates to EverPress Aluminium Industries Sdn Bhd). Alternative sources of export supply that may arise following revocation of the measure, or production capacity in the country concerned, may be relevant.
 3. Discuss factors other than subsidised imports that may have caused injury to the industry. This may be relevant to the review in that an industry weakened by other events may be more susceptible to injury from subsidisation.

Responses should be made as accurately and as comprehensively as possible. Supporting evidence should be attached wherever possible. It will not be sufficient to simply assert that the measure should remain in force.
