INSTRUCTIONS

Why you have been asked to fill out this questionnaire?

The Anti-Dumping Commission (the Commission) is conducting a review of measures applying to zinc coated (galvanised) steel exported to Australia from the People’s Republic of China (China), the Republic of India (India), the Republic of Korea (Korea), Malaysia, Taiwan, and the Socialist Republic of Vietnam (Vietnam). This questionnaire is only for exporters from Korea, Malaysia, Taiwan or Vietnam. Another exporter questionnaire is available for exporters from China or India.

The Commission will use the information you provide to determine normal values and export prices over the review period 1 July 2018 to 30 June 2019 (the period). This information will determine whether zinc coated (galvanised) steel is dumped.

If you do not manufacture the goods

If you play a role in the export of the goods but do not produce or manufacture the goods (for example, you are a trading company, broker, or vendor dealing in the goods), it is important that you forward a copy of this questionnaire to the relevant manufacturers and inform the case manager of the contact details for these manufacturers immediately.

The Commission will still require your company to complete this exporter questionnaire except Section G – Cost to make and sell.

What happens if you do not respond to this questionnaire?

You do not have to complete the questionnaire. However, if you do not respond, do not provide all of the information sought, do not provide information within a reasonable time period, or do not allow the Commission to verify the information, we may deem your company to be an uncooperative exporter. In that case the Commission must determine a dumping margin and a subsidy margin having regard to all relevant information.

Therefore, it is in your interest to provide a complete and accurate response to this exporter questionnaire, capable of verification.

Extension requests

If you require a longer period to complete your response to this exporter questionnaire, you must submit a request to the case manager, in writing, for an extension to the due date for all or part of the questionnaire. This request must be made prior to the due date. A request for extension will be rejected if received after the due date.

When considering the extension request, the Commission will have regard to:
• the Commission’s responsibility to conduct the case in a timely and efficient manner;
• the reasons why you could not provide a response within the whole period and not only the period remaining between the request and the due date;
• ordinary business practices or commercial principles;
• the Commission’s understanding of the relevant industry;
• previous correspondence and previous dealings with your company; and
• information provided by other interested parties.

You will be informed of the decision whether your request for an extension has been rejected, granted in full or granted in part. For example, you may be granted an extension to submit all sections except for Section A or you may be granted a shorter extension than you requested.
A summary of any requests and grants of extensions to submit a response to this exporter questionnaire will be published in the public record.

**Submitting a response to the exporter questionnaire**

Responses to the exporter questionnaire should be lodged by email listed on the cover page. In submitting the response to the exporter questionnaire, you must answer all questions, include all attachments and spreadsheets, and provide a non-confidential version of your response to this exporter questionnaire.

If your response to this exporter questionnaire contains major deficiencies that, in the Commissioner’s view, cannot be quickly and easily rectified in a further response, then your company may be deemed as an uncooperative exporter.

**Confidential and non-confidential responses**

You are required to lodge a confidential version (for official use only) and a non-confidential version (for public record) of your response to this exporter questionnaire by the due date. Please ensure that each page of information you provide is clearly marked either “FOR OFFICIAL USE ONLY” or “PUBLIC RECORD”.

All information provided to the Commission in confidence will be treated accordingly. The non-confidential version of your submission will be placed on the public record, and must contain sufficient detail to allow a reasonable understanding of the substance of the information, but does not breach confidentiality nor adversely affect those interests.

A person is not required to provide a summary for the public record if the Commission can be satisfied that no such summary can be given that would allow a reasonable understanding of the substance of the information.

All submissions are required to have a bracketed explanation of deleted or blacked out information for the non-confidential version of the submission. An example of a statement to accompany deleted/blacked out text is:

[Explanation of cost allocation through the divisions, by reference to machine hours or weight].

If such an explanation is not provided, the Commission may disregard the information in the submission. Where the public record version of your response to the exporter questionnaire does not contain sufficient detail, your company may be deemed to have significantly impeded the case and be deemed an uncooperative exporter.

**Verification of the information that you supply**

The Commission may wish to conduct a visit to your company to verify your questionnaire response for completeness, relevance and accuracy of the information to your company’s records.

The verification visit is not meant to be a chance for you to provide new or additional information. The Commission expects your response to the questionnaire to be relevant, complete and accurate.

Any verification visit typically commences approximately 2 to 4 weeks after the due date of the response to the exporter questionnaire. To assist with planning of a verification visit, please contact the case manager as soon as possible for a potential verification date to be scheduled.

Verification is usually conducted over 4 days. However, in complex cases, a verification visit may be scheduled over 5 days. A verification visit will include a detailed examination of your company’s records and we will collect copies of relevant documents. The verification will require the participation of key staff, including your financial accountant, production manager and sales staff. A tour of the manufacturing facility may also be required during the verification visit.

Note that the Commission may disregard any data or information that is not verified, including new or additional information provided after the verification visit.
A report will be prepared following the verification visit, which details the outcomes of the visit. This report will be placed on the public record and may include the publication of the preliminarily-assessed dumping margin and subsidy margin. The Commission considers that the dumping margin and subsidy margin is not confidential information, but rather an aggregate figure derived from confidential data.

You will be provided with an opportunity to comment on the accuracy and confidentiality of the verification report prior to its publication on the public record.

The Commission may elect to undertake an alternative verification methodology than an on-site verification to satisfy itself of the completeness, relevance and accuracy of the data.

For information on the Commission’s verification procedures, refer to Anti-Dumping Notice No. 2016/30 available on the Commission’s website.

**Important instructions for preparing your response**

- All questions in this exporter questionnaire must be completed. If a question is not applicable to your situation, please answer the question with “Not Applicable” and provide an explanation as to why.

- All questions must be answered in English. An English translation must be provided for documents not originally in English.

- Clearly identify all units of measurement (e.g. KG) and currencies (e.g. AUD) used. Apply the same measurement consistently throughout your response to the questionnaire.

- Label all attachments to your response according to the section of the questionnaire it relates to (e.g. label the chart of accounts as Attachment A-4.6)

- The data must be created as spreadsheet files in Microsoft Excel.

- If you have used formulas to complete spreadsheets, these formulas must be retained and not hard-coded.

- You must retain all worksheets used in answering the questionnaire. Be prepared to provide these worksheets during the Commission’s verification of your data.

- If you cannot present electronic data in the requested format contact the case officer as soon as possible.

- Where possible, electronic data should be emailed or shared with the Commission via SIGBOX, a secure online document repository. Please contact the case manager to request access to SIGBOX if required.

GOODS UNDER CONSIDERATION / GOODS SUBJECT TO ANTI-DUMPING MEASURES

The goods under consideration (the goods) i.e. the goods exported to Australia, allegedly at dumped prices are:

<tr>
<td>Flat rolled iron or steel products containing alloys of a width less than 600mm and, equal to or greater than 600mm, plated or coated with zinc exported from:</td>

<td><strong>In relation to India, Malaysia and Vietnam</strong>, the goods description is:</td>
</tr>
<tr>
<td>Flat rolled iron and steel products (whether or not containing alloys) that are plated or coated with zinc exported from India, Malaysia and Vietnam. Galvanised steel of any width is included.</td>
</tr>
</tbody>
</table>

Further information

The amount of zinc coating on the steel is described as its coating mass and is nominated in grams per meter squared (g/m²) with the prefix being Z (Zinc) or ZF (Zinc converted to a Zinc/Iron alloy coating). Common coating masses used for zinc coating are: Z350, Z275, Z200, Z100, and for zinc/iron alloy coating are: ZF100, ZF80 and ZF30 or equivalents based on international standards and naming conventions.

The Commission understands from previous inquiries that trade and other names often used to describe galvanised steel include:

- “GALVABOND®” steel;
- “ZINCFORM®” steel;
- “GALVASPAN®” steel;
- “ZINCHITEN®” steel;
- “ZINCANNEAL” steel;
- “ZINCSEAL” steel;
- Galv;
- GI;
- Hot Dip Zinc coated steel;
- Hot Dip Zinc/iron alloy coated steel; and
- Galvanneal.

The goods description includes galvanised steel whether or not including any (combination of) surface treatment, for instance; whether passivated or not passivated, (often referred to as chromated or unchromated), oiled or not oiled, skin passed or not skin passed, phosphated or not phosphated (for zinc iron alloy coated steel only).

Painted galvanised steel, pre-painted galvanised steel, electro-galvanised plate steel and corrugated galvanised steel are not subject to the measures.
Tariff classification

The goods are generally, but not exclusively, classified to the following tariff classifications in Schedule 3 of the *Customs Tariff Act 1995*:

- 7210.49.00 statistical code 55, 56, 57 and 58;
- 7212.30.00 statistical code 61;
- 7225.92.00* statistical code 38*
- 7226.99.00* statistical code 71*

*These tariff subheadings only apply: (1) All exporters from India, Malaysia and Vietnam, (2) Angang Steel Co. Ltd (China); (3) Benxi Iron and Steel (Group) International Economic and Trading Co. (China); and (4) Yieh Phui Enterprise Co. Ltd (Taiwan).

Model Control Code

Details of the model control code (MCC) structure for the goods are detailed in the table below. Export sales data (Section B-2), domestic sales data (Section D-2) and cost to make and sell data (Section G-3, G-4 & G-5) submitted in this response must follow this MCC structure. At a minimum, the data must report sales and cost data separately for each of the mandatory MCC categories identified by the Commission.

</table>
In constructing a MCC, use a "-" between each category. For example: A-P-C…..

The MCCs will be used to model match export models to the identical or comparable domestic models. In addition, the MCCs will be used to determine the profitability of domestic sales in the ordinary course of trade test by comparing domestic selling prices to the corresponding cost to make and sell. The MCC may also be used to compare the export price to the cost to make the exported model as part of the constructed normal value.

If there are models manufactured and sold by your company that do not align within the MCC structure above, this should be raised by lodging a submission with the Commission as soon as is practicable, but no later than the time this questionnaire is due, otherwise the response may be deemed deficient.

B-1 Australian export sales process
1. Provide details (and diagrams if appropriate) of the export sales process of your company and any entities (e.g. agents) including:
   (a) Marketing and advertising activities
   (b) Price determination and/or negotiation process
   (c) Order placement process
   (d) Order fulfillment process and lead time
   (e) Delivery terms and process
   (f) Invoicing process
   (g) Payment terms and process

ANSWER: During the review period, Asiazone acted as an intermediate of Yieh Phui’s sales of the goods under consideration to Australia. All of Asiazone’s sales of the goods under consideration to Australia during the review period were sourced from Yieh Phui. During the review period, all of Asiazone’s sales of the goods under consideration were made to the same Australian customer, [the Australian customer]. In negotiating the terms of sale, Yieh Phui negotiated on behalf of Asiazone directly with [the Australian customer], a company which partners with [the Australian customer]. As also explained in Yieh Phui’s own questionnaire response for the purpose of this review, the sales process of Yieh Phui/Asiazone’s exports of the goods under consideration is detailed as follows:

   During the review period, Yieh Phui provided [the Australian customer] with its updated product prices periodically. The sales process typically began when [the Australian customer] solicited detailed and formal price quotations from Yieh Phui based on the intended product mix and the respective quantities. Yieh Phui then responded with detailed price quotations to [the Australian customer] and both parties would negotiate on the terms of sales either via phone calls or email. After the sales terms were resolved, Yieh Phui then passed on the details of terms to Asiazone for Asiazone to prepare a written sales contract to [the Australian customer] pursuant to the terms agreed upon by Yieh Phui and [the Australian customer]. Yieh Phui in the meantime also prepared its own sales contract for itself and for Asiazone to sign. The Asiazone-[the Australian customer] sales contract reflected the terms of sale negotiated and agreed upon between Yieh Phui and [the Australian customer]. On the other hand, even though the Yieh Phui-Asiazone sales contract generally mirrored the terms stated in the Asiazone-[the Australian customer] sales contract, the selling price from Yieh Phui to Asiazone was almost always [an explanation of pricing policy]. Once receiving the counter-signed sales contract from [the Australian customer], Asiazone then in turn signed off the Yieh Phui-Asiazone sales contract. After the signed sales contract was received by Yieh Phui from Asiazone, an internal order memorandum was prepared by Yieh Phui’s sales department in the company’s system for its production department. Production planning and preparation then began pursuant to the order.

   After production, the goods were shipped directly from Taiwan to Australia. The commercial invoice and packing list were issued by Yieh Phui to Asiazone at or about the time of shipment. Asiazone then in turn invoiced [the Australian customer]. The delivery term of Yieh Phui’s sales to Asiazone and Asiazone’s re-sales to [the Australian customer] was identical in all Yieh Phui’s exports of the goods under consideration to Australia during the review period, and were all on an [delivery term] basis.

   The term of payment for Yieh Phui’s export sales of GUC to Australia during the review period were based on Yieh Phui’s standard payment term (i.e., either “[payment term]” or “[payment term]”).
The documentation and product shipment flow can be demonstrated by the chart as follows:

2. In what currency do you invoice your customers for goods exported to Australia? If it is not in your local currency:
   (a) Do your customers pay you into a foreign currency denominated account? If yes, provide details;
   (b) Do you use forward contracts to lock in the foreign exchange rate relating to the export sales? If yes, provide details;
   (c) How is the exchange rate determined in your accounting system and how often is it updated?

**ANSWER:** Asiazone invoices its customers for goods exported to Australia in U.S. dollars, not in local currency. In receiving payments from its customers for goods exported to Australia, customers are instructed to make payment into bank accounts denominated in U.S. dollars. In the normal course of business, Asiazone does not use forward contracts to lock in the U.S. dollar exchange rate relating to sales to Australia or other export sales, as the U.S. dollar is also the accounting currency used by Asiazone in the normal course of business.

3. Are there any customers of the goods exported to Australia related to your company? If yes, please provide a list of each related customer and provide details on how the selling price is set.

**ANSWER:** No, neither Asiazone nor Yieh Phui is related to the Australian customer of the goods exported to Australia.

4. If sales are in accordance with price lists or price extras list, provide copies of these lists.

**ANSWER:** In the normal course of business, Asiazone does not use price lists for its export.

5. Do your export selling prices vary according to the distribution channel identified? If yes, provide details. Real differences in trade levels are characterised by consistent and distinct differences in functions and prices.

**ANSWER:** No, Asiazone’s export selling prices do not vary according to the distribution channel.

6. Did you provide on-invoice discounts and/or off-invoice rebates to any customer or an associate of the customer in relation to the sale of the goods exported to Australia during the period? If yes, provide a description and explain the terms and conditions that must be met by the customer to obtain the discount.

**ANSWER:** No, Asiazone did not provide on-invoice discounts or off-invoice rebates to any customer or an associate of the customer in relation to the sale of the goods exported to Australia during the review period.
7. Did you issue any credit or debit notes (directly or indirectly) to the customer or associate of the customer in relation to the sale of the goods exported to Australia during the period? If yes, provide details of the credit/debit notes including the reasons the credit/debit notes were issued.

**ANSWER:** No, Asiazon e did not issue any credit or debit notes, directly or indirectly, to the customer or associate of the customer in relationship to the sales of the goods exported to Australia during the review period.

8. The invoice date will normally be taken to be the date of sale. If you are making a claim that a different date should be taken as the date of sale:
   (a) What date are you claiming as the date of sale?
   (b) Why does this date best reflect the material terms of sale?

**ANSWER:** Asiazone is not making a claim that a date other than the invoice date should be used as the date of sale for this review. Thus, this question is not applicable.

1. Complete the worksheet named “B-2 Australian sales”
   - This worksheet lists all sales (i.e. transaction by transaction) exported to Australia of the goods invoiced within the period. This includes exports to Australia sold through a domestic customer.

2. Provide a table listing the source of the data for each column in the “B-2 Australian sales” listing.

**ANSWER:** Please see Exhibit 12 for the worksheet named “B-2 Australian sales”, which reflected Asiazone’s resale prices of the goods under consideration that Yieh Phui sold to Asiazone during the review period (which have been reported separately in Yieh Phui’s own questionnaire response). SECTION D
DOMESTIC SALES

This section is not applicable to Asiazone, as Asiazone did not have any sales in the Taiwan market, the country of export for this proceeding. Thus, Asiazone has omitted this section.
SECTION E

E-1 Credit expense
1. Do you provide credit to any domestic customers in relation to sales of like goods (i.e. payment terms that are not on a cash or pre-payment basis)? If yes:
   (a) Do you provide a rolling credit facility to your domestic customers (i.e. no specific payment terms agreed at the time of sale)? If yes:
      i. Calculate the accounts receivable turnover for each domestic customer (credit sales divided by the average accounts receivable).
      ii. Calculate the average credit term for each domestic customer by dividing 365 by the accounts receivable turnover
   (b) Do you have short term borrowings or an overdraft facility? If yes, what is the interest rate, or average of interest rates?
   (c) Do you have term deposits or other cash product (e.g. bonds)? If yes, what is the interest rate, or average of interest rates?

   ANSWER: This question is not applicable, as Asiazone did not have any sales of the goods under consideration to Taiwan, the comparison market for the purpose of this review, during the review period.

2. Do you provide credit to any Australian customers in relation to sales of the goods (i.e. payment terms that are not on a cash or pre-payment basis)? If yes:
   (a) Do you provide a rolling credit facility to your Australian customers (i.e. no specific payment terms agreed at the time of sale)? If yes:

      ii. What is the interest rate, or average of interest rates, applying to term deposits or other cash product (e.g. bonds) denominated in the same foreign currency? If yes, what is the interest rate, or average of interest rates?

E-2 Packaging
1. What is the packaging used for your domestic sales of like goods?
2. What is the packaging used for your export sales of the goods to Australia?
3. If there are distinct differences in packaging between your domestic and export sales:

2. Are there any third country customers related to your company? If yes, please provide a list of each related customer and provide details on how the selling price is set.

**ANSWER:** No, none of Asiazone’s third country customers is related to Asiazone.
