## INSTRUCTIONS

### Why you have been asked to fill out this questionnaire?

The Anti-Dumping Commission (the Commission) is conducting a review of measures applying to zinc coated (galvanised) steel exported to Australia from the People's Republic of China (China), the Republic of India (India), the Republic of Korea (Korea), Malaysia, Taiwan, and the Socialist Republic of Vietnam (Vietnam). This questionnaire is only for exporters from China. Another exporter questionnaire is available for exporters from India, Korea, Malaysia, Taiwan or Vietnam.

The Commission will use the information you provide to determine normal values and export prices over the review period 1 July 2018 to 30 June 2019 (the period). This information will determine whether zinc coated (galvanised) steel is dumped. The Commission will also use this information to determine whether zinc coated (galvanised) steel has been in receipt of countervailable subsidies over the period.

### If you do not manufacture the goods

If you play a role in the export of the goods but do not produce or manufacture the goods (for example, you are a trading company, broker, or vendor dealing in the goods), it is important that you forward a copy of this questionnaire to the relevant manufacturers and inform the case manager of the contact details for these manufacturers **immediately**.

The Commission will still require your company to complete this exporter questionnaire except Section G – Cost to make and sell.

### What happens if you do not respond to this questionnaire?

You do not have to complete the questionnaire. However, if you do not respond, do not provide all of the information sought, do not provide information within a reasonable time period, or do not allow the Commission to verify the information, we may deem your company to be an uncooperative exporter. In that case the Commission must determine a dumping margin and a subsidy margin having regard to all relevant information.

Therefore, it is in your interest to provide a complete and accurate response to this exporter questionnaire, capable of verification.

### Extension requests

If you require a longer period to complete your response to this exporter questionnaire, you must submit a request to the case manager, in writing, for an extension to the due date for all or part of the questionnaire. This request must be made prior to the due date. A request for extension will be rejected if received after the due date.

When considering the extension request, the Commission will have regard to:

- the Commission's responsibility to conduct the case in a timely and efficient manner;
- the reasons why you could not provide a response within the whole period and not only the period remaining between the request and the due date;
- ordinary business practices or commercial principles;
- the Commission's understanding of the relevant industry;
- previous correspondence and previous dealings with your company; and
- information provided by other interested parties.

More information on extensions can be found in the Customs (Extension of Time and Non-cooperation) Direction 2015 at <https://www.legislation.gov.au/Details/F2015L01736>.

You will be informed of the decision whether your request for an extension has been rejected, granted in full or granted in part. For example, you may be granted an extension to submit all sections except for Section A or you may be granted a shorter extension than you requested.

## FOR PUBLIC RECORD

A summary of any requests and grants of extensions to submit a response to this exporter questionnaire will be published in the public record.

### **Submitting a response to the exporter questionnaire**

Responses to the exporter questionnaire should be lodged by email listed on the cover page. In submitting the response to the exporter questionnaire, you must answer all questions, include all attachments and spreadsheets, and provide a non-confidential version of your response to this exporter questionnaire.

If your response to this exporter questionnaire contains major deficiencies that, in the Commissioner's view, cannot be quickly and easily rectified in a further response, then your company may be deemed as an uncooperative exporter.

### **Confidential and non-confidential responses**

You are required to lodge a confidential version (for official use only) and a non-confidential version (for public record) of your response to this exporter questionnaire by the due date. Please ensure that *each page* of information you provide is clearly marked either "FOR OFFICIAL USE ONLY" or "PUBLIC RECORD".

All information provided to the Commission in confidence will be treated accordingly. The non-confidential version of your submission will be placed on the public record, and must contain sufficient detail to allow a reasonable understanding of the substance of the information, but does not breach confidentiality nor adversely affect those interests.

A person is not required to provide a summary for the public record if the Commission can be satisfied that no such summary can be given that would allow a reasonable understanding of the substance of the information.

All submissions are required to have a bracketed explanation of deleted or blacked out information for the non-confidential version of the submission. An example of a statement to accompany deleted/blacked out text is:

[Explanation of cost allocation through the divisions, by reference to machine hours or weight].

If such an explanation is not provided, the Commission may disregard the information in the submission. Where the public record version of your response to the exporter questionnaire does not contain sufficient detail, your company may be deemed to have significantly impeded the case and be deemed an uncooperative exporter.

### **Verification of the information that you supply**

The Commission may wish to conduct a visit to your company to verify your questionnaire response for completeness, relevance and accuracy of the information to your company's records.

The verification visit is not meant to be a chance for you to provide new or additional information. The Commission expects your response to the questionnaire to be relevant, complete and accurate.

Any verification visit typically commences approximately 2 to 4 weeks after the due date of the response to the exporter questionnaire. To assist with planning of a verification visit, please contact the case manager as soon as possible for a potential verification date to be scheduled.

Verification is usually conducted over 4 days. However, in complex cases, a verification visit may be scheduled over 5 days. A verification visit will include a detailed examination of your company's records and we will collect copies of relevant documents. The verification will require the participation of key staff, including your financial accountant, production manager and sales staff. A tour of the manufacturing facility may also be required during the verification visit.

## FOR PUBLIC RECORD

Note that the Commission may disregard any data or information that is not verified, including new or additional information provided after the verification visit.

A report will be prepared following the verification visit, which details the outcomes of the visit. This report will be placed on the public record and may include the publication of the preliminarily-assessed dumping margin and subsidy margin. The Commission considers that the dumping margin and subsidy margin is not confidential information, but rather an aggregate figure derived from confidential data.

You will be provided with an opportunity to comment on the accuracy and confidentiality of the verification report prior to its publication on the public record.

The Commission may elect to undertake an alternative verification methodology than an on-site verification to satisfy itself of the completeness, relevance and accuracy of the data.

For information on the Commission's verification procedures, refer to Anti-Dumping Notice No. 2016/30 available on the Commission's website.

### **Important instructions for preparing your response**

- All questions in this exporter questionnaire must be completed. If a question is not applicable to your situation, please answer the question with "Not Applicable" and provide an explanation as to why.
- All questions must be answered in English. An English translation must be provided for documents not originally in English.
- Clearly identify all units of measurement (e.g. KG) and currencies (e.g. AUD) used. Apply the same measurement consistently throughout your response to the questionnaire.
- Label all attachments to your response according to the section of the questionnaire it relates to (e.g. label the chart of accounts as Attachment A-4.6)
- The data must be created as spreadsheet files in Microsoft Excel.
- If you have used formulas to complete spreadsheets, these formulas must be retained and not hard-coded.
- You must retain all worksheets used in answering the questionnaire. Be prepared to provide these worksheets during the Commission's verification of your data.
- If you cannot present electronic data in the requested format contact the case officer as soon as possible.
- Where possible, electronic data should be emailed or shared with the Commission via SIGBOX, a secure online document repository. Please contact the case manager to request access to SIGBOX if required.

Flat rolled iron and steel products (whether or not containing alloys) that are plated or coated with zinc exported to Australia from India, Malaysia and Vietnam. Galvanised steel of any width is included.

### Further information

The amount of zinc coating on the steel is described as its coating mass and is nominated in grams per meter squared (g/m<sup>2</sup>) with the prefix being Z (Zinc) or ZF (Zinc converted to a Zinc/Iron alloy coating). Common coating masses used for zinc coating are: Z350, Z275, Z200, Z100, and for zinc/iron alloy coating are: ZF100, ZF80 and ZF30 or equivalents based on international standards and naming conventions.

The Commission understands from previous inquiries that trade and other names often used to describe galvanised steel include:

- "GALVABOND®" steel;
- "ZINCFORM®" steel;
- "GALVSPAN®" steel;
- "ZINCHITEN®" steel;
- "ZINCANNEAL" steel;
- "ZINCSEAL" steel;
- Galv;
- GI;
- Hot Dip Zinc coated steel;
- Hot Dip Zinc/iron alloy coated steel; and
- Galvanneal.

The goods description includes galvanised steel whether or not including any (combination of) surface treatment, for instance; whether passivated or not passivated, (often referred to as chromated or unchromated), oiled or not oiled, skin passed or not skin passed, phosphated or not phosphated (for zinc iron alloy coated steel only).

Painted galvanised steel, pre-painted galvanised steel, electro-galvanised plate steel and corrugated galvanised steel are not subject to the measures.

**FOR PUBLIC RECORD**

<b>Tariff classification</b>
<p>The goods are generally, but not exclusively, classified to the following tariff classifications in Schedule 3 of the <i>Customs Tariff Act 1995</i>:</p> <ul style="list-style-type: none"> <li>• 7210.49.00 statistical code 55, 56, 57 and 58;</li> <li>• 7212.30.00 statistical code 61;</li> <li>• 7225.92.00* statistical code 38*</li> <li>• 7226.99.00* statistical code 71*</li> </ul> <p>*These tariff subheadings only apply to: (1) All exporters from India, Malaysia and Vietnam, (2) Angang Steel Co. Ltd (China); (3) Benxi Iron and Steel (Group) International Economic and Trading Co. (China); and (4) Yieh Phui Enterprise Co. Ltd (Taiwan).</p>

**Model Control Code**

**FOR PUBLIC RECORD**

In constructing a MCC, use a "-" between each category. For example: **A-P-C.....**

The MCCs will be used to model match export models to the identical or comparable domestic models. In addition, the MCCs will be used to determine the profitability of domestic sales in the ordinary course of trade test by comparing domestic selling prices to the corresponding cost to make and sell. The MCC may also be used to compare the export price to the cost to make the exported model as part of the constructed normal value.

If there are models manufactured and sold by your company that do not align within the MCC structure above, this should be raised by lodging a submission with the Commission as soon as is practicable, but no later than the time this questionnaire is due, otherwise the response may be deemed deficient.

## APPENDIX

# GLOSSARY OF TERMS

This glossary is intended to provide you with a basic understanding of technical terms that appear in the questionnaire.

### **Adjustments**

To enable a fair comparison between the export price and the normal value Australian legislation provides for the adjustment of the domestic price paid for like goods. Adjustments are made to account for sales occurring at different times, specification differences, and differences in the terms or circumstances of the sales. The adjustment to the normal value may be upward or downward. Areas where you believe an adjustment is necessary should be identified. Section E of the questionnaire refers.

Examples of adjustments that may be made include: *sales occurring at different times*

(it is sometimes necessary to compare domestic and export sales made at different times - in these circumstances an adjustment may be made to reflect price movements during that time); *specification differences; packaging; taxes; level of trade; advertising; servicing/warranty; inland freight; warehousing; export charges; credit terms; duty drawback; commissions.*

Adjustments may also be required where the normal value is based on costs to make and sell.

### **Arms length**

Sales are not considered to be at "arms length" on your domestic market if there is any consideration payable for the goods other than their price, or there is an association between the buyer and the seller which affects the price, or there will be a reimbursement, compensation or benefit for, or in respect of, the price.

### **Constructed value**

In cases where prices paid for like goods sold in the country of export cannot be used for the determination of normal value, i.e. when there are no or insufficient sales or where such sales were not made in the ordinary course of trade, normal value may be based on a constructed value. Constructed value is calculated on the basis of the cost of production of the goods under consideration plus a reasonable amount for selling, general and administration costs, and for profits, that are associated with sales on the domestic market of the country of export.

### **Cost of production/manufacturing**

The cost of production or manufacture consists of all manufacturing costs associated with the goods. It is the sum of direct materials, direct labour and factory overheads.

### **Cost to make and sell**

The cost to make and sell is the sum of the cost of production or manufacture, and the selling, general and administration costs associated with the sale of those goods.

### **Country of origin**

The country in which the last significant process in the manufacture or production of the goods was performed.

### **Date of sale**

The Commission will normally use the invoice date as recorded in the exporter or producer's records. Another date may be used if this better reflects the material terms of sale. The questionnaire directs attention to matching data sets of domestic and export sales where some other date is used, as well as matching cost information.

### **Direct labour cost**

## FOR PUBLIC RECORD

Direct labour is categorised as a variable cost, i.e. the value varies with the level of production.

### Dumping

Dumping occurs when the products of one country are exported to another country at a price less than their normal value.

### Dumping margin

Where the export price is less than the normal value the dumping margin is the amount of the difference. It can be expressed as a value or as a percentage of the export price.

### Export price

The export price of the goods is usually the price paid or payable to the exporter in arms length transactions, in most instances calculated at the Free on Board (FOB) level.

### Exporting country

The country of export is normally the country of origin from which the goods are shipped. The country of export may be an intermediate country, except where the products are merely transhipped through that country, or the products concerned are not produced in that country, and there is no comparable price in that country.

### Factory overheads

Factory overheads consist of variable costs e.g. power, supplies, indirect labour and fixed costs e.g. factory rent, factory insurance, factory depreciation etc.

### Goods under consideration (the goods)

The goods to which the application for anti-dumping action relates. That is, the goods that you have exported to Australia allegedly at dumped prices.

### Incoterms

The following abbreviations are commonly used (comment is provided concerning costs that are normally borne by the seller):

EXW	ex works (the seller's minimum obligation as costs relate to goods being made available at the sellers premises)
FCA	free carrier (main carriage not paid by seller. Pay costs until such time that the goods have been delivered at the named point into custody of a carrier named by the seller. Customs formalities, taxes etc. paid if required)
FAS	free alongside ship (main carriage not paid by seller. Deliver the goods alongside the ship)
FOB	free on board (main carriage not paid by seller. Deliver the goods on board, provide export clearance if required, pay loading costs to the point the goods have passed the ship's rail, pay customs formalities, taxes etc. payable upon exportation)
CFR	cost and freight (main carriage paid by seller. Pay all costs until delivered as well as freight, loading and unloading, pay customs formalities, taxes etc. payable upon exportation)
CIF	cost, insurance and freight (main carriage paid by seller. Pay all costs as under CFR as well as marine insurance)
CPT	the terms CFR and CIF are only used where goods are carried by sea or waterway transport
CIP	carriage paid to carriage and insurance paid to the terms CPT and CIP are used as alternatives to CFR and CIF where the goods are carried by air, road, rail etc.
DAF	delivered at frontier (goods carried by rail or road and cleared for export at the named place at the frontier. Pay costs until delivered at the frontier plus any discharge costs incurred to place the goods at the customer's disposal)
DES	delivered ex ship (goods made available to the buyer on board the ship uncleared for import at

## FOR PUBLIC RECORD

	the named port of destination. Pay all costs incurred in placed at the disposal of the buyer, pay customs formalities, taxes etc. payable upon exportation, and where necessary for transit through another country)
DDU	delivered duty unpaid (Pay all costs for carriage to the agreed point, pay customs formalities, taxes etc. payable upon exportation, and where necessary for transit through another country)
DDP	delivered duty paid (goods made available at the named place in the country of importation – all risks and costs being incurred by the seller including duties, taxes etc. incurred upon importation)

### **The period**

A period defined by the Commission over which importations of the goods are examined.

### **Like goods**

Like goods are goods sold on the domestic market of the country of export (or to a third country) that are identical in all respects to the goods or that, although not alike in all respects have characteristics closely resembling those of the goods. The term 'like goods' also refers to the goods produced by the Australian industry allegedly being injured by dumped imports.

### **Normal value**

Australian legislation sets out several ways to assess "normal value".

The preferred method is to use the price paid for like goods sold for domestic consumption in the country of export. Usually, these sales are made by you, but there may be circumstances where it is appropriate to use sales made by other sellers on the domestic market.

Sale prices must be at arms length and in the ordinary course of trade. In the absence of relevant or suitable domestic sales, the normal value may be determined by constructing a price based on all costs to make and sell the goods, and an amount for profit. Alternatively the normal value may be ascertained using the price paid for like goods sold in the ordinary course of trade at arms length to customers in a country other than Australia, however this option is rarely used.

Finally, when a normal value cannot be ascertained by any of the above methods, or if no information is provided, the Commission will determine the normal value by considering all the relevant information, including the applicant's information. This allows the applicant's information to be used where sufficient information has not been furnished or is not available.

Where domestic price generally, and the trade of the exporting country are determined or substantially influenced by the government of the exporting country, an alternative/surrogate market economy is selected by the Commission and the normal value is determined as if the surrogate country were the export source.

### **Ordinary course of trade**

Testing for "ordinary course of trade" includes a comparison of the selling price and the unit cost to make and sell for the same period. If sales in respect of a substantial quantity of goods over an extended period of time, usually 12 months, do not recover all costs and these losses are not likely to be recovered within a reasonable period of time, (again usually 12 months) then the sales are regarded as being not in the ordinary course of trade.

There may be circumstances where it is appropriate to use a period other than 12 months in assessing whether sales are in the ordinary course of trade.

Unprofitable sales are to be taken to have occurred in substantial quantities during an extended period where the unprofitable sales amount to 20% or more of the total volume of sales of the goods by the exporter over the period. An extended period of time is usually taken to be a period not less than 12 months. Where unprofitable sales are rejected, normal value is based upon remaining profitable sales provided they occur in sufficient number. Where all sales have been made at a loss, or profitable sales are insufficient, the normal value may be constructed from costs to make and sell.

**Selling, general and administration expenses (SG&A)**

The selling, general and administration expenses includes all selling, distribution, general and administration expenses including finance costs that would be incurred if the goods were sold for domestic consumption in the country of export. The amounts are determined in each case using all the available information and may include expenses incurred in:

- . domestic sales of like goods;
- . sale of goods of the same general category by the exporter; or
- . sales in the industry in the country of export.

The expenses must, however, reflect the selling, general and administration costs of the goods. Administrative and selling expenses include: director's fees, management salaries and benefits, office salaries and benefits, office supplies, insurance, promotion, entertainment, depreciation and corporate overheads.
