The Director – Investigations 4  
Anti-Dumping Commission  
GPO Box 2013  
Canberra ACT 2601

### **Copper tube exported from the Peoples Republic of China**

This submission is made on behalf of Sheng Yu Steel Co., Ltd. (“SYSCO”), in response to the Anti-Dumping Commission’s (“the Commission”) findings in Statement of Essential Facts Report No. 557 (“SEF 558”). SYSCO supports the Commission’s findings and proposed decision to terminate the investigation in so far as it relates to SYSCO.

The Commission has established that SYSCO’s aluminium zinc coated steel exports to Australia during the investigation period were not dumped, with a negative dumping margin of -5.6% being determined. SYSCO confirms that the Commission’s dumping margin finding is accurate and based upon reliable accounting records. No information has been submitted which would dispute the Commission’s findings.

SYSCO urges the Commission to terminate the investigation into its exports promptly.
