Public Record

Supplementary Questionnaire in frame of reinvestigation of certain findings in relation to continuation inquiry No. 565 (ammonium nitrate from Russia): reply

Dear Sirs,

We are writing with reference to the Supplementary Questionnaire of the Anti-Dumping Commission (“the Commission”) concerning reinvestigation of certain findings in relation to Continuation Inquiry No. 565 relating to Ammonium Nitrate exported from the Russian Federation (ADRP Review No. 134).

The Russian side confirms its position concerning the reinvestigation fixed in the letter of the Ministry of Economic Development of the Russian Federation (“the Ministry”) of January 27, 2022 No. Д12и-2015.

In order to obtain the information requested in the Supplementary Questionnaire the Ministry sent requests to the interested company and the Russian Fertilizers Producers Association, which includes JSC “SDS Azot”.

In response the Russian Fertilizers Producers Association informed the Ministry, that the new capacities of ammonium nitrate of JSC “SDS Azot” at the site in Kemerovo, which are mentioned in the Supplementary Questionnaire of the Anti-Dumping Commission with reference to the information provided by the Australian ammonium nitrate producer Orica Australia, are not facilities aimed at increasing the production of commercial ammonium nitrate, and the solution of ammonium nitrate is fully used for shipment to consumers of the Kemerovo region and for the production of urea-ammonia mixture (CAS).

Please consider this information as a reaction to the Supplementary Questionnaire.

Yours faithfully,

Andrey Nakhabin
Deputy Director of Department
of Development and Regulation of Foreign
Economic Activity
