

ANTI-DUMPING NOTICE NO. 2021/055

Customs Act 1901 – Part XVB

Aluminium Extrusions

Exported to Australia from the People’s Republic of China

Findings in relation to Accelerated Review No. 576

Public Notice under section 269ZG(3)(b) of the Customs Act 1901

The Commissioner of the Anti-Dumping Commission (the Commissioner) has completed the accelerated review, which commenced on 5 February 2021, of the anti-dumping measures applying to Aluminium Extrusions (“the goods”) exported to Australia from the People’s Republic of China by Pansia Enterprises (Nanyang) Company Limited (“the applicant”).

Recommendations resulting from that review, reasons for the recommendations and material findings of fact and law in relation to the review are contained in *Anti-Dumping Commission Report No. 576 (REP 576)*.

I, CHRISTIAN PORTER, the Minister for Industry, Science and Technology have considered REP 576 and have decided to accept the recommendations and reasons for the recommendations, including all the material findings of facts and law set out in REP 576.

Under section 269ZG(3)(b) of the *Customs Act 1901* (the Act), I declare that, with effect from 12 January 2021, the Act and the *Customs Tariff (Anti-Dumping) Act 1975* have effect as if the original dumping duty notice and countervailing duty notice had applied to the applicant but the then Minister had fixed specified different variable factors (except for the non-injurious price) relevant to the determination of duty.

The duty that has been determined is an amount worked out in accordance with the combination of fixed and variable duty method, as detailed in the table below.

Exporter	IDD Method	ICD Method	Fixed rate of combined IDD and ICD	Variable component of IDD
Pansia Enterprises (Nanyang) Company Limited	Combination	Ad valorem	60.5%	Applicable only where the actual export price is below the ascertained export price.

The combined fixed rate of ICD and IDD will be the sum of:

- the subsidy rate calculated for all countervailable subsidy programs; and
- the dumping rate calculated, less an amount for the subsidy rate applying to Program 15.

This approach avoids any overlap or double-counting that may arise from the circumstances. In this case, there are domestic subsidies (Program 15) and a constructed normal value both relating to a major cost component (primary aluminium) based on surrogate data.

The actual duty liability may be higher than the effective rate of duty due to a number of factors. Affected parties should contact the Anti-Dumping Commission (the Commission) on 13 28 46 or at clientsupport@adcommission.gov.au for further information regarding the actual duty liability calculation relevant to their particular circumstance.

REP 576 has been placed on the public record and is available at www.adcommission.gov.au

The public record may also be examined at the Anti-Dumping Commission office by contacting the case manager on the details provided below.

Enquiries about this notice may be directed to the Case Manager on telephone number (03) 8539 2470, fax number +61 3 8539 2499 or via email at investigations2@adcommission.gov.au

Dated this 18th day of May 2021

CHRISTIAN PORTER

Minister for Industry, Science and Technology
