Subject: INV 582 - CFG - Pricing structure information request [REDACTED]

Good afternoon Anthony & John,

I am writing in response to the [submission made by Guardian RAK](#) in relation to Investigation 582.

Can you please provide some more information on Oceania Glass's import price parity (IPP) model and price setting mechanisms, including:

- The overall customer specific price determination process
- Is more than one country used in the IPP? (please also provide evidence)
- How is the IPP factored into specific customer pricing negotiations?
- I understand that Malaysia is the current largest exporter, how do other countries prices influence the IPP?

I am also looking for more information in relation to the price increases made by Oceania Glass for some of its products.

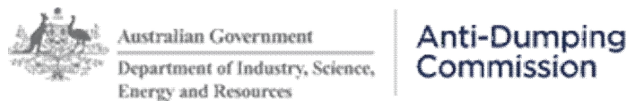

- How were these price increases determined?
- Do these price increases cover the entire increased production cost?
- Did the IPP/import pricing influence these price increases, and what was the consideration of competitor pricing?

Can you please provide a response by **Tuesday 25 January 2022**.

Kind regards,

Cameron Kennedy (he/him)
