From : Mr. Nguyen Trung Hieu - Vice General Director  
Subject : *MICCO Vietnam final opinion relating to Anti-dumping Notice No.2022/050*

Dear Mr Rhys Piper ,  
Dear Mr Bradley Armstrong,  
Dear Sirs,

We - Vinacomin Mining Chemical Industry Holding Corporation Limited (Micco) - are Vietnamese Exporter of Ammonium Nitrate, now under the investigation into the alleged dumping initiated on 08 June, 2022.

All informations that you requested, MICCO had replied you in the Reply for Exporter questionnaire and in our video conferences ( total 06 days: 05<sup>th</sup> , 06<sup>th</sup> , 08<sup>th</sup> , 13<sup>th</sup> , 15<sup>th</sup> , 19<sup>th</sup> September, 2022 ).

As we explained you before, during the investigation period from April 01<sup>st</sup> , 2021 to March 31<sup>st</sup> , 2022, MICCO had exported only one shipment of 6,480 Metric Tons of Ammonium Nitrate to J&E International (China) Co., Ltd (JE) with FOB price at Hai Phong port ( suitable with market price at that time for JE to export to the Australian market). From past to now, MICCO has been selling Ammonium Nitrate to JE at price that has been acceptable in the international market.

In addition, there is only one AN factory in Vietnam with a capacity of 200,000 MT per year, the main purpose for supply to our domestic market, If there is a surplus, we will export to other countries ( Our annual domestic demand is about 120,000 to 130,000 MT per year). The amount of AN products of Vietnamese origin exported to Australia is very small compared to the volume consumed in the Australian market , so we found that such small amount of MICCO's products can not make a significant influence on Australian Ammonium Nitrate manufacturing industry.

Therefore, we again propose your good Committee do not impose import tax in Australia on Ammonium Nitrate with origin from Vietnam.

We hope you can understand our situation and support us.

Thank you. 

Nguyen Trung Hieu  
Vice General Director
