INSTRUCTIONS

Why you have been asked to fill out this questionnaire?

The Anti-Dumping Commission (the Commission) is conducting a review into the anti-dumping measures applicable to aluminium extrusions exported to Australia from the People's Republic of China (China).

The Commissioner of the Anti-Dumping Commission has proposed to make findings with respect to this review, on the basis of the information obtained from an examination of a selected number of exporters. Refer to Appendix A of ADN 2022/081 for further details (available on the commission's website).

The Commission will use the information you provide to determine normal values and export prices over the review period (the period). This information will determine whether aluminium extrusions are dumped. The Commission will also use this information to determine whether aluminium extrusions have been in receipt of countervailable subsidies over the period.

Any information provided may be used by the Commission for any purpose consistent with its statutory functions.

If you do not manufacture the goods

If you play a role in the export of the goods but do not produce or manufacture the goods (for example, you are a trading company, broker, or vendor dealing in the goods), it is important that you forward a copy of this questionnaire to the relevant manufacturers and inform the Commission of the contact details for these manufacturers **immediately**.

The Commission will still require your company to complete this exporter questionnaire except Section G – Cost to make and sell.

What happens if you do not respond to this questionnaire?

You do not have to complete the questionnaire. However, if you do not respond, do not provide all of the information sought, do not provide information within a reasonable time period, or do not allow the Commission to verify the information, we may deem your company to be an uncooperative and/or non-cooperative exporter. In that case the Commission must determine a dumping margin and a subsidy margin having regard to all relevant information.

Therefore, it is in your interest to provide a complete and accurate response to this exporter questionnaire, capable of verification.

Extension requests

If you require a longer period to complete your response to this exporter questionnaire, you must submit a request to the Commission, in writing, for an extension to the due date for all or part of the questionnaire. This request must be made prior to the due date. A request for extension will be rejected if received after the due date.

When considering the extension request, the Commission will have regard to:

- the Commission's responsibility to conduct the case in a timely and efficient manner;
- the reasons why you could not provide a response within the whole period and not only the period remaining between the request and the due date;
- ordinary business practices or commercial principles;
- the Commission's understanding of the relevant industry;
- previous correspondence and previous dealings with your company; and
- information provided by other interested parties.

More information on extensions can be found in the *Customs (Extension of Time and Non-cooperation) Direction 2015* at <https://www.legislation.gov.au/Details/F2015L01736>.

You will be informed of the decision whether your request for an extension has been rejected, granted in full or granted in part. For example, you may be granted an extension to submit all sections except for Section A or you may be granted a shorter extension than you requested.

A summary of any requests and grants of extensions to submit a response to this exporter questionnaire will be published in the public record.

Submitting a response to the exporter questionnaire

Responses to the exporter questionnaire should be lodged by email to the address listed on the cover page. In submitting the response to the exporter questionnaire, you must answer all questions, include all attachments and spreadsheets, and provide a non-confidential version of your response to this exporter questionnaire.

If your response to this exporter questionnaire contains major deficiencies that, in the Commissioner's view, cannot be quickly and easily rectified in a further response, then your company may be considered as an uncooperative and/or non-cooperative exporter.

Confidential and non-confidential responses

You are required to lodge a confidential version (OFFICIAL: Sensitive) and a non-confidential version (for publishing on the public record) of your response to this exporter questionnaire by the due date. Please ensure that *each page* of information you provide is clearly marked either "OFFICIAL: Sensitive" or "PUBLIC RECORD".

All information provided to the Commission in confidence will be treated accordingly. The non-confidential version of your questionnaire will be placed on the public record, and must contain sufficient detail to allow a reasonable understanding of the substance of the information without breaching confidentiality.

A person is not required to provide a summary for the public record if the Commission can be satisfied that no such summary can be given that would allow a reasonable understanding of the substance of the information.

All questionnaires are required to have a bracketed explanation of deleted or blacked out information for the public record version of the questionnaire. An example of a statement to accompany deleted/blacked out text is:

[Explanation of cost allocation through the divisions, by reference to machine hours or weight].

If such an explanation is not provided, the Commission may disregard the information in the submission. Where the public record version of your response to the exporter questionnaire does not contain sufficient detail, your company may be deemed to have significantly impeded the case and be deemed an uncooperative exporter.

Verification of the information that you supply

The Commission may wish to conduct a verification of your questionnaire response for completeness, relevance and accuracy of the information to your company's records.

The verification is not meant to be a chance for you to provide new or additional information. The Commission expects your response to the questionnaire to be relevant, complete and accurate.

The verification may include Commission staff visiting your company to conduct on onsite verification¹. Any verification typically commences approximately 2 to 4 weeks after the due date of the response to the exporter questionnaire. To assist with the planning of a verification, please contact the Commission as soon as possible for a potential verification date to be scheduled.

A verification will include a detailed examination of your company's records and we will collect copies of relevant documents. The verification will require the participation of key staff, including your financial accountant, production manager and sales staff.

The Commission may elect to undertake an alternative verification methodology, rather than an onsite verification, to satisfy itself of the completeness, relevance and accuracy of the data.

Note that the Commission may disregard any data or information that is not verified, including new or additional information provided after verification.

A report will be prepared following the verification, which details the outcomes of the verification. This report will be placed on the public record and may include the publication of the preliminarily-assessed dumping margin and subsidy margin. The Commission considers that the dumping margin and subsidy margin is not confidential information, but rather an aggregate figure derived from confidential data.

You will be provided with an opportunity to comment on the accuracy and confidentiality of the verification report prior to its publication on the public record.

For information on the Commission's verification procedures, refer to ADN 2016/30 available on the Commission's website.

Important instructions for preparing your response

- All questions in this exporter questionnaire must be completed. If a question is not applicable to your situation, please answer the question with "Not Applicable" and provide an explanation as to why.
- All questions must be answered in English. An English translation must be provided for documents not originally in English. To the extent that the foreign language version differs, the English translation will be given priority as a matter of interpretation in Australia.
- Clearly identify all units of measurement (e.g. KG) and currencies (e.g. AUD) used. Apply the same measurement consistently throughout your response to the questionnaire.
- Label all attachments to your response according to the section of the questionnaire it relates to (e.g. label the chart of accounts as Attachment A-4.6)
- The data must be created as spreadsheet files in Microsoft Excel.
- If you have used formulas to complete spreadsheets, these formulas must be retained and not hard-coded.
- You must retain all worksheets used in answering the questionnaire. Be prepared to provide these worksheets during the Commission's verification of your data.
- If you cannot present electronic data in the requested format contact the case officer as soon as possible.

¹ The Commission has temporarily suspended onsite verification due to the COVID-19 pandemic (refer to Anti-Dumping Notice No. 2020/29). However, your response to the exporter questionnaire may still be subject to onsite verification should the suspension of onsite verifications be lifted.

- Where possible, electronic data should be shared with the Commission via email. Where files are too large for email they should be shared with the Commission via SIGBOX, a secure online document repository. Please contact the Commission to request access to SIGBOX if required.

GOODS UNDER CONSIDERATION / GOODS SUBJECT TO ANTI-DUMPING MEASURES

The goods subject to anti-dumping measures (the goods) are:

Aluminium extrusions produced via an extrusion process, of alloys having metallic elements falling within the alloy designations published by The Aluminium Association commencing with 1, 2, 3, 5, 6 or 7 (or proprietary or other certifying body equivalents), with the finish being as extruded (mill), mechanical, anodized or painted or otherwise coated, whether or not worked, having a wall thickness or diameter greater than 0.5 mm, with a maximum weight per metre of 27 kilograms and a profile or cross-section which fits within a circle having a diameter of 421 mm.

The goods include aluminium extrusion products that have been further processed or fabricated to a limited extent, after aluminium has been extruded through a die. Aluminium extrusion products that have been painted, anodised, or otherwise coated, or worked (e.g. precision cut, machined, punched or drilled) fall within the scope of the goods.

The goods do not extend to intermediate or finished products that are processed or fabricated to such an extent that they no longer possess the nature and physical characteristics of an aluminium extrusion, but have become a different product.

Consistent with previous investigations, the review will also rely upon the information shown in the table below in its assessment of the goods under consideration and like goods.

< GUC >				< Non GUC >		
1	2	3	4	5	6	7
Aluminium extrusions	Aluminium extrusions with minor working	Aluminium extrusions that are parts intended for use in intermediate or finished products	Aluminium extrusions that are themselves finished products	Unassembled products containing aluminium extrusions, e.g. 'kits' that at time of import comprise all necessary parts to assemble finished goods	Intermediate or partly assembled products containing aluminium extrusions	Fully assembled finished products containing aluminium extrusions
< Examples >						
Mill finish, painted, powder coated, anodised, or otherwise coated aluminium extrusions	Precision cut, machined, punched or drilled aluminium extrusions	Aluminium extrusions designed for use in a door or window	Carpet liner, fence posts, heat sinks	Shower frame kits, window kits, unassembled unitised curtain walls	Unglazed window or door frames	Windows, doors

The goods subject to the anti-dumping measures may be classified to the following subheadings in Schedule 3 of the *Customs Tariff Act 1995*:

7604.10.00/06	non alloyed aluminium bars, rods and profiles
7604.21.00/07	aluminium alloy hollow angles and other shapes
7604.21.00/08	aluminium alloy hollow profiles
7604.29.00/09	aluminium alloy non hollow angles and other shapes
7604.29.00/10	aluminium alloy non hollow profiles
7608.10.00/09	non alloyed aluminium tubes and pipes
7608.20.00/10	aluminium alloy tubes and pipes
7610.10.00/12	doors, windows and their frames and thresholds for doors
7610.90.00/13	Other

Model control code

Details of the model control code (MCC) structure for the goods are detailed in the table below. Export sales data (Section B-2), domestic sales data (Section D-2) and cost to make and sell data (Section G-3, G-4 & G-5) submitted in this response must follow this MCC structure. At a minimum, the data must report sales and cost data separately for each of the mandatory MCC categories identified by the Commission.

Category	Sub-category		Sales data	Cost data
Finish	A	Anodise	Mandatory	Mandatory
	BD	Bright dip		
	M	Mill		
	PC	Powder coating		
Alloy code	6A	6060, 6063	Mandatory	Optional
	6B	6106		
	6C	6101, 1350, 6082, 6351, 6061		
	6D	6005A		
	O	Other*		
Temper code	T1	T1, T4, T5, T6	Optional	Optional
	T50	T591, T595, T52		
	O	Other*		
Anodising microns	0	Not anodised	Optional	Optional
	1	<20µm		
	2	>20µm		

* Specify alloy code and temper code

In constructing a MCC, use a "-" between each category. For example, a powder coated aluminium extrusion with alloy code 6060 and temper code T5 will have an MCC of **PC-6A-T1-0**.

The MCCs will be used to match export models to the identical or comparable domestic models. In addition, the MCCs will be used to determine the profitability of domestic sales in the ordinary course of trade by comparing domestic selling prices to the corresponding cost to make and sell. The MCC may also be used to compare the export price to the cost to make the exported model as part of the constructed normal value.

If there are models manufactured and sold by your company that do not align within the MCC structure above, this should be raised by lodging a submission with the Commission as soon as is practicable, but no later than the time this questionnaire is due, otherwise the response may be considered deficient.
