## **FILE NOTE**

### **Exemption Inquiry EX0074 into Anti-Dumping Measures**

#### **Certain Aluminium Extrusions**

#### **Exported to Australia from the People's Republic of China, Malaysia and the Socialist Republic of Vietnam**

This file note is to advise interested parties of a minor change to the exemption goods description in respect of EX0074. EX0074 follows an application for an exemption from interim dumping duty and dumping duty and interim countervailing duty and countervailing duty by Auswide Equipment Pty Ltd.<sup>1</sup>

*Exemption goods description submitted by the applicant and notified in ADN 2019/095*

The exemption goods described in the application and notified in Anti-Dumping Notice (ADN 2019/095) were:

*The exemption goods are aluminium channel extruded in alloy designation 7005 with temper designation T593. These materials are used in the manufacture of plant trailers and loading ramps for the transportation and loading of earthmoving equipment.*

*The exemption goods of aluminium channel made from alloy and temper designations 7005-T593 being sought are of the following dimensions:*

- *105mm x 50mm channel at 3.4 meters long, with a flange thickness of 7mm and wall thickness of 4mm.*
- *125mm x 50mm channel at 3.4 metres long, with a flange thickness of 8mm and wall thickness of 4mm.*
- *150mm x 50mm channel at 3.4 metres long, with a flange thickness of 9mm and wall thickness of 4.5mm.*
- *160mm x 60mm channel at 3.4 metres long, with a flange thickness of 9mm and wall thickness of 6mm.*

---

<sup>1</sup> The exemption goods descriptions for two other inquiries relating to the same applicant remain unchanged (EX0075 and EX0076 refer).

Examination of the exemption goods description

As part of this exemption inquiry, the Commission examined the extrusion diagrams<sup>2</sup> submitted by the applicant in its application<sup>3</sup> and observed that the flange thickness for one extrusion was misreported in the application as 9mm instead of 8mm, as listed on the relevant extrusion diagram (sketch number CA0000653). The Commission confirmed with the applicant that it had made an error in its application and that the correct flange thickness was 8mm.

The revised exemption goods description is below.

Revised exemption goods description for EX0074

*The exemption goods are aluminium channel extruded in alloy designation 7005 with temper designation T593. These materials are used in the manufacture of plant trailers and loading ramps for the transportation and loading of earthmoving equipment.*

*The exemption goods of aluminium channel made from alloy and temper designations 7005-T593 being sought are of the following dimensions:*

- *105mm x 50mm channel at 3.4 meters long, with a flange thickness of 7mm and wall thickness of 4mm.*
- *125mm x 50mm channel at 3.4 metres long, with a flange thickness of 8mm and wall thickness of 4mm.*
- *150mm x 50mm channel at 3.4 metres long, with a flange thickness of 8mm and wall thickness of 4.5mm.*
- *160mm x 60mm channel at 3.4 metres long, with a flange thickness of 9mm and wall thickness of 6mm.*
