**Decision of the State Council on Adjusting the Catalogue of Industrial Product Production License Management and Trial on Simplify the Approval Procedure**

GF[2017] No.34

The people's governments of all provinces, autonomous regions, and municipalities directly under the Central Government, all ministries and commissions of the State Council, and all directly affiliated institutions:

After research and demonstration, the State Council decides to further adjust the product catalog for the implementation of industrial product production license management, abolishes 19 types of industrial product production license management, and transfers 3 types of industrial products from implementing production license management to implementing mandatory product certification management. The administrative authority of production licenses for 8 types of industrial products will be delegated from the General Administration of Quality Supervision, Inspection and Quarantine to the quality and technical supervision department of the provincial people's government. After the adjustment, a total of 38 categories of products continue to be managed under the management of industrial product production licenses, including 19 categories implemented by the General Administration of Quality Supervision, Inspection and Quarantine, and 19 categories implemented by the quality and technical supervision department of the provincial people's government.

For products that continue to implement production license management for industrial products, in order to improve the efficiency of examination and approval and reduce the cost of obtaining certificates for enterprises, the General Administration of Quality Supervision, Inspection and Quarantine, in accordance with the relevant provisions of the "Administrative Licensing Law of the People's Republic of China", organizes relevant regions and industries to trial on simplify the production license approval procedures: first, to cancel the product inspection before the issuance of the certificate, instead, the enterprise shall submit the product inspection report issued by a qualified inspection and testing institution; second, post on-site review. After an enterprise submits an application and a product inspection report and makes a commitment to ensure product quality and safety, those who pass the formal review can first obtain a production license and then undergo on-site review. For enterprises that have obtained certificates through simplified procedures, in the follow-up supervision and

inspection, if product inspection or production conditions are found to be inconsistent with the requirements, the license-issuing department shall revoke the production license according to law.

All regions and relevant departments must step up efforts to adjust the catalogue of industrial product production license management and implement and link up the trial implementation of simplified approval procedures, accelerate the construction of supporting regulations and systems, ensure funding, improve relevant technical standards, and steadily implement related products from production license management to compulsory product certification management. It is necessary to insist on the combination of and paying equal attention on decentralization and management, strengthen supervision during and after the event, increase the intensity of random inspections according to the “double random, one open” method, increase the frequency and varieties of random inspections, expand the coverage of random inspections, to achieve full coverage of random inspections for the products whose production license management is cancelled this time. It is necessary to urge enterprises to implement the main responsibility to ensure that the responsibility for the quality and safety of industrial products is in place. The State Council will revise relevant administrative regulations in due course in accordance with the trial implementation of simplified approval procedures.

Annexes:

1. Products catalogue on cancellation of production licenses for industrial products, switch to the implementation of mandatory product certification management and decentralized management authority (30 categories in total)

2. Products catalogue on continue implementation of industrial product production license management after adjustment (38 categories in total)

State Council

June 24, 2017

Annex 1:

Products catalogue on cancellation of production licenses for industrial products, switch to the implementation of mandatory product certification management and decentralized management authority (30 categories in total)

No.	Product Name	Current implementing agency	Adjustment situation
1	Tax-controlled cash register	Administration of Quality Supervision	Cancel
2	Oil pumping equipment	Administration of Quality Supervision	Cancel
3	Drilling suspension tool	Administration of Quality Supervision	Cancel
4	BOP and BOP control	Administration of Quality	Cancel

	device	Supervision	
5	Power fittings	Administration of Quality Supervision	Cancel
6	Transmission line tower	Administration of Quality Supervision	Cancel
7	Copper and copper alloy pipes	Administration of Quality Supervision	Cancel
8	Cotton processing machinery	Administration of Quality Supervision	Cancel
9	Motorized thresher	Administration of Quality Supervision	Cancel
10	Factory-made glasses	Administration of Quality Supervision	Cancel
11	Aluminum and titanium alloy processed products	Administration of Quality Supervision	Cancel
12	Battery	Administration of Quality Supervision	Cancel
13	Rubber products	Quality and Technical Supervision Department of Provincial People's Government	Cancel
14	Power rectifier	Quality and Technical Supervision Department of Provincial People's Government	Cancel
15	Geotechnical Engineering Instruments	Quality and Technical Supervision Department of Provincial People's Government	Cancel
16	Pump	Quality and Technical Supervision Department of Provincial People's Government	Cancel
17	Power dispatch communication equipment	Quality and Technical Supervision Department of Provincial People's Government	Cancel
18	Hydrological instrument	Quality and Technical Supervision Department of Provincial People's Government	Cancel
19	Water pipe	Quality and Technical Supervision Department of Provincial People's Government	Cancel
20	Electric blanket	Quality and Technical Supervision Department of Provincial People's Government	Switch to the implementation of mandatory product certification management
21	Moped	Quality and Technical Supervision Department of Provincial People's Government	Switch to the implementation of mandatory product certification management

22	Motorcycle helmet	Quality and Technical Supervision Department of Provincial People's Government	Switch to the implementation of mandatory product certification management
23	Grinding wheel	Administration of Quality Supervision	Decentralized to the quality and technical supervision department of the provincial people's government for approval and certification
24	Feed crushing machinery	Administration of Quality Supervision	Decentralized to the quality and technical supervision department of the provincial people's government for approval and certification
25	Construction hoist	Administration of Quality Supervision	Decentralized to the quality and technical supervision department of the provincial people's government for approval and certification
26	Wire rope	Administration of Quality Supervision	Decentralized to the quality and technical supervision department of the provincial people's government for approval and certification
27	Light and small lifting and transportation equipment	Administration of Quality Supervision	Decentralized to the quality and technical supervision department of the provincial people's government for approval and certification
28	Steel for prestressed concrete	Administration of Quality Supervision	Decentralized to the quality and technical supervision department of the provincial people's government for approval and certification
29	Prestressed concrete sleeper	Administration of Quality Supervision	Decentralized to the quality and technical supervision department of the provincial people's government for approval and certification
30	Lifesaving equipment	Administration of Quality Supervision	Decentralized to the quality and technical

			supervision department of the provincial people's government for approval and certification

Annex 2:

Products catalogue on continue implementation of industrial product production license management after adjustment (38 categories in total)

No.	Product Name	Implementing authority
1	Rebar for construction	Administration of Quality Supervision
2	Bearing steel	Administration of Quality Supervision
3	Cement	Administration of Quality Supervision
4	RMB discriminator	Administration of Quality Supervision
5	Anti-counterfeiting technology products	Administration of Quality Supervision
6	IC card and IC card reader	Administration of Quality Supervision
7	Satellite TV broadcasting ground receiving equipment	Administration of Quality Supervision
8	Wireless broadcast television transmitting equipment	Administration of Quality Supervision
9	Broadcast communication tower and mast	Administration of Quality Supervision
10	Explosion-proof electrical	Administration of Quality Supervision
11	Gas appliance	Administration of Quality Supervision
12	Air compressor	Administration of Quality Supervision
13	Port handling machinery	Administration of Quality Supervision
14	Friction materials and sealing products	Administration of Quality Supervision
15	Highway bridge support	Administration of Quality Supervision
16	Simply supported beam of prestressed concrete railway bridge	Administration of Quality Supervision
17	Hydraulic metal structure	Administration of Quality Supervision
18	Refrigeration equipment	Administration of Quality Supervision
19	Internal combustion engine	Administration of Quality Supervision
20	Grinding wheel	Provincial People's Government Quality and Technical Supervision Department
21	Feed crushing machinery	Provincial People's Government Quality and Technical Supervision Department
22	Construction hoist	Provincial People's Government Quality and Technical Supervision Department
23	Wire rope	Provincial People's Government Quality and Technical Supervision Department
24	Light and small lifting and transportation equipment	Provincial People's Government Quality and Technical Supervision Department
25	Steel for prestressed concrete	Provincial People's Government Quality

		and Technical Supervision Department
26	Prestressed concrete sleeper	Provincial People's Government Quality and Technical Supervision Department
27	Lifesaving equipment	Provincial People's Government Quality and Technical Supervision Department
28	Special labor protection products	Provincial People's Government Quality and Technical Supervision Department
29	Wire and Cable	Provincial People's Government Quality and Technical Supervision Department
30	Refractory	Provincial People's Government Quality and Technical Supervision Department
