Anti-Dumping Review Panel

Customs Act 1901

Notice under section 269ZZI

Certain Hollow Structural Sections exported from the Kingdom of Thailand

The Anti-Dumping Review Panel (ADRP) received an application for review of a decision by the Assistant Minister for Science, Jobs and Innovation to vary the variable factors in respect of the dumping duty notice applying to Certain Hollow Structural Sections exported from the Kingdom of Thailand (the Reviewable Decision). The application was received from Austube Mills Pty Ltd.

The Assistant Minister's decision was published on the Anti-Dumping Commission (ADC) website on 27 June 2018 ([Anti-Dumping Notice No. 2018/88](#)).

The ADRP is satisfied that the following ground is a reasonable ground for the reviewable decision not being the correct or preferable decision:

- (a) The reviewable decision was not the correct or preferable decision because the Minister's determination of the ascertained normal value for the exporter, Thai Premium Pipe Co Ltd, did not include an adjustment to account for physical differences between exported good and the like goods.

The goods to which these applications relate are:

Certain electric resistance welded pipe and tube made of steel, comprising circular and non-circular hollow sections in galvanised and non-galvanised finishes, whether or not including alloys. The goods are normally referred to as either CHS (circular hollow sections) or RHS (rectangular or square hollow sections). The goods are collectively referred to as HSS (hollow structural sections). Finish types for the goods include pre-galvanised, hot-dipped galvanised (HDG), and non-galvanised HSS.

Sizes of the goods are, for circular products, those exceeding 21 mm up to and including 165.1 mm in outside diameter and, for oval, square and rectangular products those with a perimeter up to and including 950.0 mm. CHS with other

than plain ends (such as threaded, swaged and shouldered) are also included within the goods coverage.

The following goods are excluded from the anti-dumping measures:

- conveyor tube made for high speed idler rolls on conveyor systems, with inner and outer fin protrusions removed by scarfing (not exceeding 0.1 mm on outer surface and 0.25 mm on inner surface), and out of round standards (i.e. ovality) which do not exceed 0.6 mm in order to maintain vibration free rotation and minimum wind noise during operation);
- precision RHS with a nominal thickness of less than 1.6 mm (i.e. not used in structural applications); and
- stainless steel CHS and RHS sections.

The ADRP proposes to conduct a review of the decision.

Submissions

Interested parties have **30 days** from the date this notice is published to provide the ADRP with a submission.

If your submission contains confidential information, you must provide a public version that can be published on the ADRP website. Failure to do so will result in your submission not being considered.

You may either email your submission to ADRP@industry.gov.au or mail the submission to -

Anti-Dumping Review Panel Secretariat
GPO Box 2013
Canberra City ACT 2601

Persons wishing to make further inquiries about this review should telephone (02) 6276 1781. Copies of the applications for review, which set out the grounds for seeking review in full, and other documents are available on the public record of the review at www.adreviewpanel.gov.au

The reports of the original investigation are available on the ADC website at www.adcommission.gov.au
