Customs Act 1901

Notice under section 269ZZI

Aluminium Zinc Coated Steel of a width equal to or greater than 600 millimetres exported from the Republic of Korea, Taiwan and the Socialist Republic of Vietnam

The Anti-Dumping Review Panel (Review Panel) received applications from Hoa Sen Group Joint Stock Company (HSG) and Macsteel International Australia (Macsteel) seeking a review of a decision by the Minister for Industry, Energy and Emissions Reduction (the Minister) to publish a dumping duty notice under section 269TG(1) and (2) of the *Customs Act 1901* in respect of Aluminium Zinc Coated Steel of a width equal to or greater than 600 millimetres exported from the Republic of Korea (Korea) and the Socialist Republic of Vietnam (the Reviewable Decision).

The Reviewable Decision was published on the Anti-Dumping Commission (ADC) website on 24 December 2021 ([ADN 2021/147](#)).

The Review Panel is satisfied that the following grounds are reasonable grounds for the Reviewable Decision not being the correct or preferable decision:

HSG

The Minister erred by incorrectly calculating the timing adjustment in determining HSG's normal values.

Macsteel

The Minister erred in finding that exports from Korea caused material injury to the Australian industry producing like goods.

The Review Panel proposes to conduct a review of the Reviewable Decision in relation to the above grounds.

The goods to which these applications relate are:

Flat rolled iron and steel products (whether or not containing alloys), of a width equal to or greater than 600 millimetres ("mm"), plated or coated with aluminium-zinc alloys, not painted, and whether or not including resin coating.

Further information on the goods:

Trade or further generic names often used to describe the subject goods include:

NON-CONFIDENTIAL

- ZINCALUME® steel;
- GALVALUME® steel;
- Aluzinc, Supalume, Superlume, ZAM, GALFAN;
- Zinc aluminium coated steel;
- Aluminium zinc coated steel;
- Aluminium zinc magnesium coated steel;
- Alu-Zinc Steel sheet in Coils;
- Al/Zn; and
- Hot Dipped 55% Aluminium-Zinc Alloy coated steel sheet in coil.

The imported goods the subject of this application covers aluminium zinc coated steel whether or not including any combination of surface treatment. For example, whether passivated (often referred to as chromated), resin coated or not resin coated (often referred to as Anti-Finger Print (“AFP”) or not AFP), oiled or not oiled, skin-passed or not skin-passed.

Excluded from the goods description of this application is un-passivated (often referred to as unchromated) aluminium zinc coated steel.

The amount of aluminium zinc coating on the steel is described as its coating mass and is nominated in grams per meter squared (g/m²), with the prefix being AZ (Aluminium Zinc). Common coating masses used are: AZ200, AZ150, AZ100, and AZ70.

There are several relevant International Standards for aluminium zinc coated steel, covering the full range of products via specific grade designations, and including the recommended or guaranteed properties of each of those product grades.

These relevant standards are noted in the table below.
