

#### Customs Act 1901

## Notice under section 269ZZI

# Aluminium Extrusions exported from Malaysia and the Socialist Republic of Vietnam

The Anti-Dumping Review Panel (Review Panel) received an application from Capral Limited seeking a review of a decision by the Minister for Industry and Science made under section 269ZHG(1)(a) of the *Customs Act 1901* not to secure the continuation of anti-dumping measures applying to Aluminium Extrusions exported from Malaysia and the Socialist Republic of Vietnam (the Reviewable Decision).

The Reviewable Decision was published on the Anti-Dumping Commission (ADC) website on 24 June 2022 (ADN 2022/042).

The Review Panel is satisfied that the following grounds are reasonable grounds for the Reviewable Decision not being the correct or preferable decision:

# Capral Limited

- There is absence of a 'demonstrable connection' between the price advantage that dumping gives to exporters from Malaysia and Vietnam, is not the correct or preferred decision.
- 2) There is no evidence to demonstrate a connection between 'the economic condition of the industry, specifically in terms of how it sets its prices which is distinct from the influence of other sources of the goods', is not the correct or preferred decision.
- 3) In the absence of the measures it is likely that the Australian industry would experience a recurrence of the material injury that the measures are intended to prevent.

The Review Panel proposes to conduct a review of the Reviewable Decision in relation to the above grounds.

The goods to which these applications relate are:

Aluminium extrusions produced via an extrusion process, of alloys having metallic elements falling within the alloy designations published by The Aluminium Association commencing with 1, 2, 3, 5, 6 or 7 (or proprietary or other certifying body equivalents), with the finish being as extruded (mill), mechanical, anodized or painted or otherwise coated, whether or not worked, having a wall thickness or diameter greater than 0.5 mm, with a maximum weight per metre of 27 kilograms and a profile or cross-section which fits within a circle having a diameter of 421 mm.

The goods under consideration include aluminium extrusion products that have been further processed or fabricated to a limited extent, after aluminium has been extruded through a die. For example, aluminium extrusion products that have been painted, anodised or otherwise coated, or worked (e.g. precision cut, machined, punched or drilled) fall within the scope of the goods.

The goods do not extend to intermediate or finished products that are processed or fabricated to such an extent that they no longer possess the nature and physical characteristics of an aluminium extrusion, but have become a different product.

## **Submissions**

Interested parties have **30 days** from the date on which this notice is published to provide the Review Panel with a submission. Your submission should indicate your eligibility to make a submission as either an interested party to the Reviewable Decision or as one of the specified entities under section 269ZZJ of the Act.

If your submission contains confidential information, you must provide a public version that can be published on the Review Panel website. Failure to do so will result in your submission not being considered.

You may either email your submission to ADRP@industry.gov.au or mail the submission to:

Anti-Dumping Review Panel Secretariat GPO Box 2013 Canberra City ACT 2601

Persons wishing to make further inquiries about this review should telephone (02) 6276 1781. Copies of the applications for review, which set out the grounds for seeking review in full, and other documents are available on the public record of the review at <a href="https://www.adreviewpanel.gov.au">www.adreviewpanel.gov.au</a>

The reports of the original investigation are available on the ADC website at www.adcommission.gov.au
