Customs Act 1901

Notice under section 269ZZI

Interchangeable bolted clipping system clip heads exported from the People's Republic of China

The Anti-Dumping Review Panel ('Review Panel') received an application from AC Plumbing Supplies Pty Ltd seeking a review of the Minister for Industry and Innovation and Minister for Science's decision under sections 269TG(1) and (2) of the *Customs Act 1901* ('the Act') in respect of interchangeable bolted clipping system clip heads exported from the People's Republic of China ('the Reviewable Decision').

The Reviewable Decision was published on the Anti-Dumping Commission ('ADC') website on 2 October 2025 ([ADN 2025/090](#) refers).

The Review Panel is satisfied that the following grounds are reasonable grounds for the Reviewable Decision not being the correct or preferable decision:

- 1) Ground 1 - Incorrect reliance on s 269TAC(6) to determine the normal value
- 2) Ground 2 - Normal values not in "ordinary course of trade"
- 3) Ground 3 - Erroneous determination of material injury, based on the following factors:
 - a) Price undercutting.
 - b) Market size and composition;
 - c) Loss of sales volumes to mutual customers;
 - d) Profit effects; and
 - e) The size of the dumping margins.

The Review Panel proposes to conduct a review of the Reviewable Decision in relation to the above grounds.

The goods to which the application relates are:

Interchangeable bolted clipping system clip-heads, with galvanized or powder coating finish, in the size range 12 to 150 mm (i.e. 0.5 inch to 6 inch) diameter, with elongated emboss and square hole for interlocking coach bolt and nut.

Supporting physical appearance information:

This interchangeable bolted clipping system also ensures the linear alignment of the clip head with the bracket, not allowing for any movement when installed.

The interchangeable bolted clipping system clip-heads are manufactured from galvanised hot rolled coil (HRC). The grade of galvanised HRC is Z275 grade and is of varying thicknesses of 1mm to 2 mm, dependent upon model of clip-head.
