Dear Commissioner,

**Review Application by BlueScope- Subsidisation of Hot Rolled Plate Steel from China**

**s 269ZZL (1) Request.**

The submissions made in respect of the review from BlueScope (and on behalf of Shandong Iron and Steel Company Limited (Jigang)) reject the use of the export price of Chinese coking coal as being appropriate to use as the benchmark in the determination of adequate remuneration of coking coal. As is acknowledged in REP198, in reliance of what was stated in REP 193, the use of the Chinese export prices was found not to be without problems. The ADC considered, but rejected, the use of the import price of coking coal for the reasons stated in Appendix 2.3.2 of REP198. I would appreciate the assistance of the ADC in reinvestigating whether the use of the import price of coking coal to China may provide a more appropriate benchmark. Without limiting the scope of the request made, the Commission's attention is drawn to the submission made on behalf of Jigang dated 20 August 2013 to comments contained in the final paragraph of the first page and the remaining paragraphs relating to point 1 of the second page and request that the Commission comment on them as part of its reconsideration of this issue.

For purposes of s269ZZL (2) I set **22 April 2014** as the time in which the reinvestigation is to be completed.

Yours truly,

Graham McDonald  
ADRP Panel Member
