## Australian Industry Participation Plan Summary - Project Phase

---

**Nominated project proponent:** Sydney Metro

### Project details

Name: Sydney Metro Western Sydney Airport

Location: Multiple locations in the Sydney Metropolitan area

Type: Land transport facility

Purpose: Establish new facility

Capital expenditure: \$10 billion - \$20 billion

Description: The Western Sydney Airport line is the new railway line that will service Greater Western Sydney and the new Western Sydney International (Nancy-Bird Walton) Airport. The new railway will become the transport spine for the Western Parkland City's growth for generations to come, connecting communities and travellers with the rest of Sydney's public transport system with a fast, safe and easy metro service. The project consists of: • Stations at Western Sydney International airport and the Western Sydney Aerotropolis; • A station at St Marys, interchanging with the existing suburban railway station and connecting customers with the rest of Sydney's rail system; • New stations at Orchard Hills and Luddenham will service a future commercial and mixed-use precinct, and an education and innovation precinct; • Fully-automated driverless trains like the rest of the Sydney Metro system with fast, frequent services – customers won't need a timetable, they'll just turn up and go. The Australian and NSW governments have a shared objective of having the metro rail operational when Western Sydney International opens for passenger services. The project moved into full delivery phase in 2023 following the procurement of three major contract packages. The Station Box and Tunnelling (SBT) works was awarded to CPB Contractors. The Surface Civil and Alignment Works (SCAW) contract awarded to CPB Contractors and United Infrastructure. At least 20% of the workforce will be from Greater Western Sydney. The Stations, Systems, Trains Operations and Maintenance (SSTOM) contract was awarded to the Parklife Metro consortium under the largest Public Private Partnership in NSW to date. AIP principals have been applied to each of these major contract packages and all procurements to date.

Completion date: 31 Dec 2026

## Key goods and services

Indicative list of key goods and services to be acquired for the project:

Key goods and services	Opportunities for Australian entities*	Opportunities for non-Australian entities	Explanation for no opportunities for Australian entities
Tunnelling design and Construction	Yes	Yes	
Concrete, Steel reinforcement, Building Materials, Steel, Track, Plant	Yes	Yes	
Civil engineering design and construction	Yes	Yes	
Structural design and construction	Yes	Yes	
Design, construction, operation and maintenance of trains, systems and stations	Yes	Yes	
Mechanical & Electrical Systems, Lifts & Escalators, High Voltage Systems	Yes	Yes	
Overhead Line & Traction Power Supply Systems, Tunnel Ventilation Systems	Yes	Yes	
Platform Screen Doors, Tracksides Intrusion Detection Systems, Signalling Systems	Yes	Yes	
Central Train Control System, Line Wide Communication Systems,	Yes	Yes	
Traffic Control Services, Railway Corridor Safe Access Services, Demolition	Yes	Yes	
Railway Corridor Works and Professional Services	Yes	Yes	

\* An Australian entity is an entity with an ABN or ACN

Project standards:

Australian  
International

## Supplier information and communication

Project proponent's contact person for supplier enquiries:

**Contact person name** Sam Field  
**Contact person position** Director Procurement  
**Phone number** 0481032658  
**E-mail** sam.field@transport.nsw.gov.au

Project proponent website: <https://www.sydneymetro.info/>

Project opportunities website: <https://www.sydneymetro.info/> <https://www.tenders.nsw.gov.au/> <https://www.icn.org.au/>

Supplier engagement and communication actions :

Promote project opportunities through industry associations  
 Conduct supplier information briefings on project opportunities and bid processes  
 Issue media releases or ASX announcements on project developments and opportunities  
 Develop and distribute a supplier information guide for the project  
 Directly contact suppliers with information on project opportunities and bid processes

## Building Australian industry capability

### Supplier capability development actions:

- Encourage joint ventures and alliances between suppliers
- Support supplier development initiatives of industry associations or governments

### Global supply chain integration actions:

- Introduce suppliers to global supply chain partners
- Support supplier export and global integration initiatives of industry associations or governments

### Feedback process for unsuccessful bidders:

Sydney Metro offers unsuccessful tenderers a debrief. This is conducted via feedback sessions to outline the reasons why a bid was not successful and provide input on potential areas for improvement. A contact officer and contact details are provided on each letter to unsuccessful tenderers.
