Australian Industry Participation Plan Summary - Project Phase

Nominated project proponent: NEOEN AUSTRALIA PTY. LTD.

Project details

Name: Goyder North Wind Farm

Location: North of Burra

Type: Electricity facility

Purpose: Establish new facility

Capital expenditure: \$1 billion - \$2 billion

Description: The Goyder North Wind Farm is a utility-scale project located approximately 20 km north-east of Burra in regional South Australia, within the Goyder Renewables Zone. The project will comprise up to 99 wind turbines, associated concrete foundations and hardstands, internal access roads, underground medium-voltage electrical reticulation, substations, operations and maintenance facilities, temporary construction compounds and meteorological masts. Electricity generated by the wind farm will be transmitted via a new approximately 50 km overhead 275kV transmission line connecting to ElectraNet's existing Bunday substation, located east of Robertstown. The project forms part of the broader Goyder Renewables Zone, which includes additional wind generation, battery energy storage and transmission infrastructure. Principal activities will include site establishment and enabling works, civil earthworks and road upgrades, turbine foundation construction, delivery and erection of wind turbine generators, electrical balance-of-plant installation, transmission line and substation works, commissioning and testing, and transition to long-term operations and maintenance. The contracting phase has commenced, with major contract execution targeted for Q2 2026. Construction is expected to commence in Q3 2026 and continue for approximately 2.5 years, with commissioning and entry into commercial operations to follow completion of construction activities. At the time of preparation of this Australian Industry Participation Plan, no Australian Government funding, grants or equity investment are expected for the project. During the operations phase, the project does not currently anticipate discrete goods or services packages exceeding \$1 million. Should goods or services over this threshold be required, the actions and commitments approved under this Australian Industry Participation Plan (AIPP) will be implemented as part of the relevant procurement processes.

Completion date: 30 Jun 2029

Key goods and services

Indicative list of key goods and services to be acquired for the project:

Key goods and services	Opportunities for Australian entities*	Opportunities for non-Australian entities	Explanation for no opportunities for Australian entities
Wind Turbines (Nacelles, Hubs & Blades)	No	Yes	No manufacturers based within Australia
Wind Turbine Towers	Yes	Yes	
Wind Turbine Foundation Bolts	Yes	Yes	
Quarry Materials	Yes	No	
Concrete Supply	Yes	No	
Reinforcing Steel	Yes	Yes	
Electrical Cabling	Yes	Yes	
Electrical Transmission Line Poles & Towers	Yes	Yes	
Electrical Substation Equipment	Yes	Yes	
International Shipping & Logistics	Yes	Yes	
Domestic Transport & Logistics	Yes	No	
Earthmoving & Excavation	Yes	No	
Design & Construction of Roads & Hardstands	Yes	No	
Construction of Wind Turbine Foundations	Yes	No	
Construction of Underground Cabling	Yes	No	
Construction of Overhead Transmission Lines	Yes	No	
Construction of Electrical Substations	Yes	No	
Erection & Installation of Wind Turbines	Yes	No	
Engineering & Design Consultancy Services	Yes	No	

* An Australian entity is an entity with an ABN or ACN

Project standards:

Australian
International

Supplier information and communication

Project proponent's contact person for supplier enquiries:

Contact person name John Turner
Contact person position Procurement Manager
Phone number 0417612439
E-mail john.turner@neoen.com

Project proponent website: <https://goyderenergy.com.au/>

Project opportunities website:

<https://goyderenergy.com.au/work-with-us/>

<https://gateway.icn.org.au/>

Supplier engagement and communication actions :

- Engage with vendor identification agencies on project opportunities and bid processes
- Conduct supplier information briefings on project opportunities and bid processes
- Issue media releases or ASX announcements on project developments and opportunities
- Develop and distribute a supplier information guide for the project

Building Australian industry capability

Supplier capability development actions:

- Recommend suppliers undertake training and/or accreditation
- Provide onsite or internal training or accreditation

Global supply chain integration actions:

- Provide references for high performing suppliers

Feedback:

The project proponent will ensure that its procurement entities offer, and if requested, provide feedback to Australian entities whose bids to supply key goods or services for the project have not been successful. Feedback will include recommendations about any relevant training, skills capability and capacity development.

Australian Industry Participation Plan Summary - Operations Phase

Nominated facility operator: NEOEN AUSTRALIA PTY. LTD.

Facility details

Name: Goyder North Wind Farm

Location: North of Burra

Type: Electricity facility

Key goods and services

Indicative list of key goods and services to be acquired for the new facility:

Key goods and services	Opportunities for Australian entities*	Opportunities for non-Australian entities	Explanation for no opportunities for Australian entities
Operations and Maintenance Wind Farm	Yes	No	
Operations and Maintenance Connection Assets	Yes	No	

*An Australian entity is an entity with an ABN or ACN

Facility standards:
