Australian Industry Participation Plan Summary – Project Phase

Nominated project proponent:

KONDININ ENERGY PTY LTD

Project details

Project name:

Kondinin Wind Farm

Location:

Kondinin, Western Australia

Type:

Electricity facility

Purpose:

Establish new facility

Capital expenditure:

\$500 million - \$1 billion

Capital expenditure:

☒ Confirm the total project estimated capital expenditure value will be \$500 million or more

Description:

The project proponent is developing a wind farm located near Kondinin, Western Australia. The facility will include up to 21 wind turbine generators (Vestas V162 6.2MW) with a total maximum rated capacity of 130.2 MW, as well as establishing a new wind farm substation and associated infrastructure.

Key scopes of work of the wind farm to be completed will include construction of gravel roads, laying of power cables, erection of power lines, turbine foundations to be excavated and poured, and turbines to be assembled. As well as direct employees, direct services that will need to be contracted include plant hire, geotechnical drillers, transportation, excavators, crane and lifting specialists, engineers, surveyors, fitters, electrical contractors, accommodation and catering.

Project procurement is being undertaken via a full-wrap EPC contracting procurement strategy which will involve a single contract interface for the construction of the wind farm project. Additional construction activities will be undertaken with the WA electricity network operator, Western Power, with those works being performed under their regulated framework. Operations and Maintenance activities will be procured under a single contractor model also.

Procurement activities initiated in 2023, when the project was in early design and technology suitability assessment.

Importantly, we note that only recently we became aware that the project would exceed the \$500m threshold for capital expenditure and, as such, have passed the earliest trigger date. Accordingly, our notification is within 14 days following.

The project's delivery timetable includes the achievement of financial close in September 2026, site mobilisation in January 2027, and full commercial operations by June 2029.

Estimated completion date:

13/07/2029

Key goods and services

Indicative list of key goods and services to be acquired for the project:

List of key goods and services:

An Australian entity is an entity with an ABN or CAN.

Key goods and services	Opportunity for entities	Explanation for no opportunities for Australian entities
Turbine foundations	Opportunities for Australian entities	
Turbine towers	Opportunities for Australian entities Opportunities for non-Australian entities	
Turbine blades	Opportunities for Australian entities Opportunities for non-Australian entities	
Turbine nacelles	Opportunities for Australian entities Opportunities for non-Australian entities	
Turbine transportation	Opportunities for Australian entities	
Electrical cables	Opportunities for Australian entities Opportunities for non-Australian entities	
Electrical substation primary and secondary equipment	Opportunities for Australian entities Opportunities for non-Australian entities	
EPC project management	Opportunities for Australian entities	
Electrical installation and commissioning works	Opportunities for Australian entities	
Civil works	Opportunities for Australian entities	
Communications systems	Opportunities for Australian entities	

	Opportunities for non-Australian entities	
Site facility buildings - operations	Opportunities for Australian entities	
Temporary site facilities - construction	Opportunities for Australian entities	

Project standards:

Australian, International

Supplier information and communication

Project Proponents Contact Person

Project proponent's contact person for supplier enquires.

Contact person's name:

Project Proponent Website

Project proponent website:

<https://shellenergy.com.au/decarbonisation/projects/kondinin-wind-and-solar-project/>

Project Opportunities Website

List of websites:

Is this website active?	Is this website active?	Date the website is expected to go live:
https://gateway.icn.org.au/	Yes	

Supplier engagement and communication actions:

Engage with vendor identification agencies on project opportunities and bid processes
Directly contact suppliers with information on project opportunities and bid processes

Building Australian industry capability

Supplier capability development actions:

Recommend suppliers undertake training and/or accreditation
Support supplier development initiatives of industry associations or governments

Global supply chain integration actions:

Facilitate strategic partnering and joint ventures between Australian and international suppliers

Feedback:

Confirm you, and/or your procurement entities will offer and, if requested, provide feedback to unsuccessful Australian entities whose bids to supply key goods or services for the project have not been successful
Confirm feedback provided to unsuccessful bidders will include any recommendations of relevant training, skills, capability and capacity development
Confirm you will collect written evidence of feedback offered or provided to unsuccessful bidders

Australian Industry Participation Plan Summary – Operations Phase

Nominated facility operator:

KONDININ ENERGY PTY LTD
