Description:

PROJECT DESCRIPTION

The Wallaby Mine Enabling Infrastructure Project delivers an integrated upgrade of ventilation, cooling and power infrastructure required to support safe and sustainable mining operations at increasing depth within the Wallaby Underground Mine at Granny Smith Mine Site.

Ventilation Infrastructure

Ventilation upgrades to maintain airflow and thermal conditions as mining progresses to deeper levels.

Cooling Infrastructure

Cooling infrastructure to manage increasing underground heat loads associated with deeper mining which includes:

- Surface ammonia refrigeration plant
- Surface boreholes
- Underground heat exchangers and bulk air coolers
- Underground water reticulation network

Power Infrastructure

- Expansion of the power station

- Surface high-voltage distribution
- Underground HV reticulation

PROCUREMENT APPROACH

- The project and procurement will be delivered directly by a Gold Fields project team.
- Contracting and procurement activities are well progressed and only Australian registered business have been invited to tender.
- Procurement tendering activities commenced in Nov/Dec 2025. At this time the full project was estimated to be A\$230M.
- As of August 2026, the estimated cost of the project is still being refined and it is not certain the AIP threshold of \$A500M will apply to this project. However, an AIP Plan is being submitted while the project cost is being determined.

Estimated completion date:

29/02/2028
