### **3 Standards to be used in the project**

- In undertaking the design and construction, the Project will use Australian standards and where appropriate, international standards that Australian companies can meet

### **4. AIP activities undertaken by the Project Proponent**

- Utilise the NSW Government Tenders website to publically advertise procurement opportunities
- Utilise the Sydney Metro website to provide details of procurement opportunities
- Utilise major contractor's websites to provide details of procurement opportunities
- Hold public industry briefings to communicate the types of opportunities available to Australian entities and how Australian entities can respond to opportunities
- Consult with relevant industry associations and local industry to help identify capable and competitive Australian entities suitable to supply goods and services to the project.
- Provide feedback to contractors/suppliers that are unsuccessful in their bid to supply goods and services
- Encourage capability development for Australian entities through major contractors
- Monitoring compliance by major contractors with the AIP Plan and the Sydney Metro Workforce Development Plan

### **5. AIP activities to be undertaken by procurement entities**

- Post procurement opportunities on the Industry Capability Network website for Expressions of Interest
- Contractor website links will be made available on the Sydney Metro website
- Report regularly to assist the project with compliance against the AIP plan
