### **3 Standards to be used in the Facility**

- Australian standards will be used or International Standards in common use in Australia.

### **4. AIP activities undertaken by the Operator**

- The Project has worked with the Community Consultative Committee to highlight any opportunities that will be available to regional businesses. These opportunities have been raised via the established regular forums between the Project and the Community Consultative Committee.
- The Project will publish media releases/statements through relevant media (newspapers, industry magazines and/or business journals) detailing supply opportunities and how Australian suppliers can respond to those opportunities.
- The Project will make direct contact with Australian industry (personal letters or emails) inviting tender responses or informing about opportunities and how to respond to those opportunities. Iron Road will also utilise the network of organisations with which it currently holds membership to promote opportunities.
- The Project will create a supplier portal dedicated to the Project, detailing the types of opportunities available to Australian industry and how to respond to those opportunities.

### **5. AIP activities to be undertaken by Procurement Entities**

- An Operations Contractor will likely be the procurement entity for the new facility – refer to AIP activities detailed above.
