

Australian Industry Participation (AIP) plan Summary - Operations Phase

1. Project Details

Designated operator: OZ Minerals Carrapateena Pty Ltd

Project Name: Carrapateena

Description of the facility: Underground sub level caving mining operation and associated infrastructure including Mineral Processing Plant and Accommodation Village

Facility location: Approximately 160 kilometres north of Port Augusta, South Australia

Link to facility information: www.ozminerals.icn.org.au

Operator contact for procurement information: Paul Henningsen, Manager – Projects, paul.henningsen@ozminerals.com 08 8394 0632

Other operators involved in the facility: N/A

2. Opportunities to supply Goods and Services

| Expected Opportunities | Opportunities for Australian Entities | Opportunities for non-Australian Entities |
|--|---------------------------------------|---|
| Construction of Western Access Road | YES | NO |
| Conveyors | YES | NO |
| Craneage | YES | NO |
| Steel pipe supply (CSP) | YES | YES |
| Temporary site offices/crib facilities (including furniture) | YES | NO |
| Reinforcement supply | YES | NO |
| Safety equipment (PPE, fire extinguishers, etc.) | YES | NO |
| Grizzlies | YES | NO |
| Vent ducting | YES | YES |
| VSD | YES | NO |
| Switchrooms | YES | NO |
| Pumps | YES | YES |
| Instruments | YES | NO |
| Tyres | YES | NO |

| | | |
|---|-----|-----|
| Screens | YES | NO |
| Tanks | YES | NO |
| Design, engineering and construction for major infrastructure including roads power line, camps and plant | YES | NO |
| Aviation | YES | NO |
| Drainage Installation | YES | NO |
| Earthworks subcontractor | YES | NO |
| Fencing and gates | YES | NO |
| Concrete, steel fixing and formwork | YES | NO |
| Electrical, comms and security (supply & installation) | YES | NO |
| Fuel management system and storage | YES | NO |
| Mechanical subcontractor | YES | NO |
| Metalwork items (bollards, crash rails, handrails etc) | YES | NO |
| Soft landscaping and irrigation | YES | NO |
| Skilled labour hire – carpenters; boilermakers; skilled dogman, operators, riggers. | YES | NO |
| Transport and logistics | YES | NO |
| Shop detailing | YES | YES |
| Steel fabrication | YES | YES |
| Camp catering and maintenance services | YES | NO |
| UG HV reticulation | YES | YES |
| Paving | YES | NO |
| Semi-autonomous | YES | NO |
| Resource definition drilling | YES | NO |
| Camp relocation and upgrade | YES | NO |

Disclaimer: The information provided in the table above is based on an initial assessment by the company. Any questions or issues should be raised with the facility contact.

3 Standards to be used in the facility

- ISO 14011 environmental management system
- ISO 9001-2000 quality management system
- Australian/New Zealand standards and International Standards as required. These will be detailed in relevant work packages.

4. AIP activities to be undertaken by the Operator

Carrapateena implemented the following roles and functions to optimise local and Australian/NZ participation:

- Projects Manager On site oversight of site procurement function and point of contact.
- Contracts & Procurement Function – Development, release, management and evaluation of tenders.
- Local Content Advisor – Working with local suppliers to engage with local business groups, the traditional owners and pastoralists.
- ICN Advisor- The point of contact connected to the Australian/NZ wider community as well as being an agency of the South Australian Department of State Development.
- Partnering with the Global Manufacturing – Upper Spencer Gulf (GMUSG) advisory group to promote the project opportunities for local suppliers.

Processes are in place to provide clarity and to reduce administration for all parties including:

- Registration of expressions of interest through the ICN Gateway Portal (the Portal). As this is an A/NZ Portal if suppliers have completed ICN registration previously, the ICN will be able to use the existing registration information.
- Development of a Pre-qualification questionnaire so suppliers will only have to complete this once and it may be used across all relevant work packages.
- Work packages will be published on the Portal and ICN Work Package alerts and notifications tailored to the supplier's capability.
- Provision of feedback to unsuccessful bidders regarding the shortcomings of any proposals to improve their understanding of tendering requirements and competition in their service offerings. This feedback, where applicable, will include referrals to appropriate government support services including but not limited to AusIndustry.

5. AIP activities to be undertaken by procurement entities

- Development of procurement standards aligned to values associated with community and supplier engagement and training in these standards.
- Inclusion of specific roles in the organisational structure to support industry engagement.
- Ensure that tenderers are advised of processes for engaging local business and releasing work packages into the domestic market.
- Ensure an appropriate selection of employees are trained in the use of the ICN Gateway.
