

Australian Industry Participation (AIP) plan Summary - Operations Phase

1. Facility Details

Designated operator: Mount Bruce Mining Pty Limited

Facility name: Koodaideri Mine

Description of the project:

The development of a new iron ore mine and associated rail infrastructure extending from the Koodaideri mine to Rio Tinto's existing rail network at Lyre. The Project will include the following components:

- a primary crushing facility;
- a dry crushing and screening plant;
- product sampling;
- a stockyard with associated stackers and reclaimer;
- train load-out facility;
- a 220 kV transmission line connecting to the Yandicoogina transmission line;
- a 220/33 kV switchyard;
- site control systems and communications, fire detection and security;
- a borefield for water supply;
- non-process infrastructure (administration buildings, workshops, warehouse, explosive storage facility, vehicle wash and fuelling facilities);
- a new airport;
- bridges;
- access roads;
- accommodation village, and temporary construction camps;
- 170 km of new railway including rail sidings and junctions;
- level crossings;
- a rail maintenance track;
- radio base stations and fibre optic cabling;
- signalling, communications and asset protection system upgrades; and
- construction facilities, such as laydown areas, haul roads, borrow pits, site offices and construction and potable water sources.

The construction period is expected to be about three years. Rio Tinto has engaged WorleyParsons Services Pty Ltd as the project's Engineering, Procurement and Construction Manager (EPCM).

Facility location: Approximately 110 km northwest of Newman in the Pilbara region of Western Australia, adjacent to the Fortescue Marsh.

Odette Money

Manager Contracts, Rio Tinto Projects

Tel: +61 (08) 6213 0152

Email: odette.money@riotinto.com

Other operators involved in the facility: Not applicable.

2. Opportunities to supply Goods and Services

Expected opportunities	Opportunities for Australian entities	Opportunities for non-Australian entities
Goods		
Unknown at the time of submission of draft AIP Plan. Details relating to the opportunities within the Operational Phase will be provided in an update to the AIP plan closer to the commencement of this phase.		
Services		
Unknown at the time of submission of draft AIP plan. Details relating to the opportunities within the Operational Phase will be provided in an update to the AIP plan closer to the commencement of this phase.		

Disclaimer: The information provided in the table above is based on an initial assessment by the company. Any questions or issues should be raised with the operator contact.

Explanation for item(s) in list above where it is indicated ‘No Opportunities for Australian entities’

Not applicable.

3. Standards to be used in the facility

It is a Rio Tinto requirement that standards utilised are either Australian or internationally recognised equivalents, unless otherwise justified due to specific technological, commercial, intellectual property or similar requirements.

4. AIP activities to be undertaken by the Operator

- Availability of the Rio Tinto Procurement (RTP) Local Procurement Platform (LPP)
- Publication of successful contractors on the LPP.
- Development of supplier communication materials outlining process to register in supplying, with information available on the LPP.
- Supplier information sessions (roadshows) to inform local industry of upcoming opportunities to supply goods and services to the operation, plus the opportunity to meet key representatives from RTP and Rio Tinto Operations.

5. AIP activities to be undertaken by procurement entities

Not applicable.
