

# Australian Industry Participation (AIP) plan Summary - Operations Phase

## 1. Facility Details

**Designated operator:** Project Sea Dragon Pty Ltd

**Facility name:** Project Sea Dragon

**Description of the facility:** Project Sea Dragon (PSD) is a large, fully integrated, prawn aquaculture project located in northern Australia. At completion, and subject to project financing, Stage 1 of the project involves prawn production on land-based ponds, producing nominally 10,000-12,000 tonnes per annum (tpa) of prawns. Stage 1 is defined as three (3) farms, or approximately 1,116 hectares of prawn farming capacity at Legune Station, plus associated infrastructure onsite and offsite, breeding facilities and associated infrastructure in the Darwin environs, a processing plant and associated infrastructure in Kununurra and a Founder Stock Centre at Exmouth. Stage 1 will be a phased process, with Step 1 of Stage 1 expected to produce 5,000 tpa of prawns. Preliminary works are underway for Stage 1, and subject to the timing of financing, completion of construction for Step 1 of Stage 1 is expected by early-mid 2021. Subject to further funding, the full scope of Stage 1 construction at Legune will be ongoing until 2023. PSD involves new facilities, except for the Founder Stock Centre and Quarantine Centre in Exmouth which is an upgrade to an existing facility.

**Facility location:** Legune Station (Northern Territory), Darwin area, and Kununurra and Exmouth in Western Australia

**Link to facility information:** <http://seafarmgroup.com.au/>; <https://gateway.icn.org.au>

**Operator contact for procurement information:** Dallas Donovan, Operations Director, 07 3248 0221, info@projectseadragon.com.au

**Other operators involved in the facility:** N/A

## 2. Opportunities to supply Goods and Services

Expected opportunities	Opportunities for Australian entities	Opportunities for non-Australian entities
<b>Goods</b>		
Poly tunnels	Yes	No
Pumps, valves and fittings	Yes	Yes
Poly piping	Yes	No
Tanks	Yes	Yes
Reverse Osmosis (RO) equipment	Yes	Yes
Compressors and aeration equipment	Yes	Yes

<b>Expected opportunities</b>	<b>Opportunities for Australian entities</b>	<b>Opportunities for non-Australian entities</b>
Temperature control equipment	Yes	Yes
Screens	Yes	Yes
Prefabricated freezer rooms	Yes	Yes
Chemicals supply- first fills	Yes	No
Power generation equipment	Yes	Yes
Switchrooms- incl HV and LV switchgear	Yes	Yes
Aerators- combo units	Yes	Yes
Harvesting equipment	Yes	Yes
Compressors and chiller equipment	Yes	Yes
Processing plant equipment	Yes	Yes
Laboratory equipment	Yes	Yes
Light vehicles	Yes	No
Electric forklifts	Yes	Yes
Ambulance supply and Paramedic stock	Yes	No
Storage racking	Yes	No
Workshop equipment- miscellaneous	Yes	No
Boats	Yes	No
Pump test equipment	Yes	No
<b>Services</b>		
Maintenance services - Darwin	Yes	No
Maintenance services – Legune Station	Yes	No
Maintenance services – Kununurra	Yes	No

Disclaimer: The information provided in the table above is based on an initial assessment by the company. Any questions or issues should be raised with the facility contact.

## Explanation for item(s) in list above where it is indicated 'No Opportunities for Australian entities'

N/A

### **3. Standards to be used in the facility**

- Australian Standards, or in some circumstances an approved, recognised international equivalent Standard, will be applied to the project. All Australian entities experienced in the provision of the respective goods or services have the ability to meet these standards.

### **4. AIP activities to be undertaken by the Operator**

- PSD and the Industry Capability Network (ICN) have been, and will continue to be, in regular, proactive contact for the duration of the project. PSD has been appointed a nominated ICN representative to support the procurement processes.
- The Project is currently listed on the ICN Gateway and it has its own ICN Project Page. On this page, contractors can submit a general Expression of Interest (EOI) to be kept up to date with the project and its procurement activities. Operating period roles will be identified throughout the construction and delivery phase.
- PSD has and will continue to utilise the ICN's substantial database of contractors/suppliers to support the procurement process. In addition, the Project Team is keeping a register of interested contractors/suppliers, e.g. where they engage with the project via means other than the ICN Gateway/Project Page.
- The pre-qualification requirements will be listed on the ICN Gateway and subsequently within specific package procurement documentation issued to the market and shortlisted participants.
- If requested by the supplier, PSD will provide recommendations for relevant training to assist Australian suppliers with capability development.
- PSD would be pleased to provide references or act as a referee for high performing suppliers to assist their integration into domestic and global supply chains, should this be requested.

### **5. AIP activities to be undertaken by procurement entities**

- PSD is the primary procurement entity and will make its in house procurement officers aware of the intent and requirements of the AIP Plan including through training, if required. However, should PSD engage a third party procurement entity, PSD undertakes that all procurement entities will be suitably qualified and familiar with the requirements as set out in the AIP plan and any procurement procedure documents that focus opportunities on Australian entities. Further to this, any third party procurement entity will be obliged to use or liaise with the ICN to ensure that Australian entities will be given opportunity.
- As noted above, interested contractors / suppliers are able to register their interest in the project at any time through the ICN Gateway.
- From time to time, PSD will via a print media campaign, specifically the NT News, alert the market to potential available opportunities (e.g. for large packages of work or project milestones).
- Work packages that have an expected value greater than the "low-value contract threshold amount" as defined in the Australian Jobs Act 2013 will be released via the ICN Project Page for the EOI process. This is also where contractors/suppliers will submit their EOI responses. The Seafarms (PSD) website will have a link to the ICN Project Page (it will not duplicate the EOI documentation/ process).

- Following the evaluation and shortlisting process, the Request for Tender (RFT) phase will commence and this will be conducted directly with shortlisted parties via email (not through the ICN) from the Project Team.
- Awarded contracts will be listed on the ICN Project Page.
- Following selection of the preferred contractor and award phase, unsuccessful shortlisted parties will be notified and offered a debrief.
