

Australian Industry Participation (AIP) plan Summary – Project Phase

1. Project Details

Designated project proponent: Stockyard Hill Wind Farm Pty Ltd

Project name: Stockyard Hill Wind Farm

Description of the project: Stockyard Hill Wind Farm is a nominal 532 MW wind farm. Construction of the wind farm incorporates a diverse range of activities, including manufacture, delivery and erection of 149 3.x MW wind turbine generators, bulk earthworks and internal road construction (approx. 110km), public road modifications, construction of wind turbine foundations (inclusive of concrete, reinforcing steel & hold down assemblies), trenching and laying cable for underground electrical reticulation systems, substation construction (inclusive of power transformers, switchyard, electrical protection systems, switchrooms & substation automation system), high voltage export transmission line, lattice tower meteorological monitoring masts, construction of operations facility buildings and associated consulting services (environmental, geotechnical, design). The project will be executed via a turn key EPC (Engineer Procure Construct) carried out by Goldwind Australia Pty Ltd who will be responsible for 2 main workstreams; 1) Supply and Install of Wind Turbines, and 2) Balance of Plant or BoP (roads, on site electrical etc). The BoP workstream will be subcontracted to a Procurement Entity who will in turn sub-contract out various work packages. The appointment of the BoP Procurement Entity is expected to occur in Q4 2017, with tendering of various work packages and construction work commencing on site in Q1 2018. The project is expected to be connected to the electricity grid by Q1 of 2019 with all turbines operational by the end of Q1 2020.

Estimated project value: \$760 Million

Project location: Between Beaufort and Skipton, South West Victoria

Link to project information: <http://www.stockyardhillwindfarm.com.au>

Project contact for procurement information: Navneet Sharma, 1800 753 730, stockyard@goldwindaustralia.com

Other project proponents involved in the project: Not Applicable

2. Opportunities to supply Goods and Services

Expected opportunities	Opportunities for Australian entities	Opportunities for non-Australian entities
Wind Turbine Generators	No ¹	Yes
Wind Turbine Support towers	Yes	Yes

¹ Wind Turbine Generators will not be purchased in Australia as there is no manufacturing presence in Australia for these components (based on recent research of Australian industry capability by Stockyard Hill Wind Farm).

Expected opportunities	Opportunities for Australian entities	Opportunities for non-Australian entities
Bulk Earthworks	Yes	No
Concrete Supply	Yes	No
Reinforcing Steel supply	Yes	No
Holddown bolt supply	Yes	Yes
Civil construction	Yes	No
Trenching and cable laying	Yes	No
HV & MV electrical equipment supply	Yes	Yes
HV transmission line construction	Yes	No
Building construction	Yes	No
Cranage and erection	Yes	No
Services		
Design Services	Yes	No
Logistics services	Yes	No

Disclaimer: The information provided in the table above is based on an initial assessment by the company. Any questions or issues should be raised with the project contact.

3. Standards to be used in the project

- Australian and recognised International standards will be used for the project.

4. AIP activities to be undertaken by the Project Proponent

The Project Proponent will:

- Publish prequalification requirements, standards for key goods and services and the contact details for procurement officers on the Stockyard Hill Wind Farm website.
- Set up and maintain ICN Gateway webpage for interested parties to register their interest in the project work packages.
- Ensure information from interested parties is passed to the appropriate Procurement Entities.
- Establish a local shopfront to provide suppliers with project information and opportunities.
- Maintain a database of applicable training opportunities that may be of interest to various participating entities and distribute this information down the supply chain on a regular basis.
- Manage compliance with the AIP Plan.

5. AIP activities to be undertaken by procurement entities

Procurement Entities will:

- Provide contact details of their procurement officer for publication on the project websites.
- Manage detailed tendering and procurement prequalification processes.
