Disclaimer: The information provided in the table above is based on an initial assessment by the company. Any questions or issues should be raised with the facility contact.

## Explanation for item(s) in list above where it is indicated 'No Opportunities for Australian entities'

Not applicable
----------------

### **3. Standards to be used in the facility**

It is a Woodside requirement that standards utilised for the development are either Australian or internationally recognised equivalents, unless otherwise justified due to specific technological, commercial, intellectual property or similar requirements.

### **4. AIP activities to be undertaken by the Operator**

- The activities undertaken by Woodside will ensure that full, fair and reasonable opportunity has been provided to Australian companies. Woodside will ensure that obligations arising under the *Australian Jobs Act 2013 (Cth)* (the Act) are fulfilled and are cascaded down in contracts with procurement entities.
- Woodside, when acting as a procurement entity, will engage in advance of commencement of tendering activity of key goods and services with the Industry Capability Network WA (ICNWA) or an independent service provider to determine whether Australian capability and capacity exists for scopes of work equal to or in excess of \$1 million.
- Where ICNWA or an independent service provider confirms that Australian industry capability exists, procurement entities will advertise relevant scopes of work on an online advertisement platform (e.g. ICN Gateway or equivalent) seeking Australian industry expressions of interest prior to commencing further vendor market engagement.
- Where a potential supplier that has been recommended by ICNWA, but not included in the tender list, requests feedback, ICNWA on behalf of the procurement entity will provide such feedback and as appropriate, recommend areas for improvement and referrals to support services such as the Entrepreneur's Programme.
- Where required, Woodside will develop AIP training material for its staff to be delivered to contracts and procurement personnel to understand the requirements, use an independent industry capability verification service to access Australian capability, and utilise the online advertisement platform. These training materials will be provided to Woodside's procurement entities as appropriate.
- Woodside will periodically run an AIP assurance process to ensure appropriate AIP processes are followed by Woodside personnel and procurement entity personnel.

### **5. AIP activities to be undertaken by procurement entities**

Woodside as part of the tender and award process for the engagement of procurement entities will ensure that the requirements of the Act have been incorporated into the agreement between the parties, including the requirements in respect of:

1. The Project AIP Plan;
2. Contractor AIP Contact Officer;
3. Contractor AIP Plans;
4. Online advertisement platform Vendor Portal;
5. AIP Training;
6. AIP assurance process; and
7. Project Proponent / Contractor - Unsuccessful bidder feedback.
