

Australian Industry Participation (AIP) Plan Executive Summary

1. General Project Details

Company Name: Moreton Bay Regional Council

Description of the project: The project is located on Youngs Crossing Road, within Moreton Bay Regional Council in South East Queensland. As the 3rd largest Council in Australia these infrastructure projects are important to support the continued population growth being experienced. Upon completion, the project will upgrade the current 1100m length between Protheroe Rd, Joyner and Dayboro Road, Petrie from two to four-lanes, including a median divide, three new traffic signal intersections and a single 212-metre long bridge spanning North Pine River and Sideling Creek. The road and bridge upgrade will deliver a flood immunity to a 1% Annual Exceedance Probability (AEP) standard, thereby meeting the main objective to provide a “flood free” arterial road which currently (as of 2019) carries 17,500 vehicles per day and on average (since 2010) is closed 4.5 days per year due to flooding. The upgrade will also support foreseeable future growth, including the adjacent expanding residential suburbs and the expected traffic growth (to 2031) of between 2-3% pa. Such growth is mainly due to expected population increases within Moreton Bay Regional Council (MBRC) currently projected to increase by over 40% from 480,000 (in 2020) to 690,000 (by 2041).

Estimated total project value: \$64,000,000 (\$64m)

- **Estimated value of key goods and services procured for the project (if different to total project value):** Provide project description

Project location: Youngs Crossing Road, Joyner

Project contact for procurement information: Michael Powell, 07 3205 0555, 0417 548 749, Procurement@moretonbay.qld.gov.au

2. Opportunities for Australian industry involvement

List of goods and services to be procured for the project and the expected opportunity for industry participation	Opportunities for Australian suppliers*	Opportunities for overseas suppliers
<ul style="list-style-type: none"> • Construction Services including bridge construction, asphalt paving, traffic control, transport services and electrical installation (streetlighting, traffic signals). 	Yes	No
<ul style="list-style-type: none"> • Design Services 	Yes	No
<ul style="list-style-type: none"> • Labour Services including external construction workers and internal Council project workers 	Yes	No
<ul style="list-style-type: none"> • Materials – may include reinforcing steel, concrete, concrete pipes, concrete culverts, bridge beams, asphalt, road signs, streetlights, and landscaping materials. 	Yes	No
<ul style="list-style-type: none"> • Machine/equipment hire – may include earthmoving equipment, bridge construction equipment, falsework, formwork and computer systems. 	Yes	No

*An Australian supplier means an entity that has an ABN or an ACN.

Disclaimer: The information provided in the table above is based on an initial assessment by the company. Any questions or issues should be raised with the project contact.

3. Communication Strategy

- Project website to promote awareness of the project and procurement opportunities

- Industry briefing in consultation with Civil Contractors Federation Qld and Queensland Major Contractors Association
- Regular media releases via the project website, email to subscribed recipients and MBRC media room website

4. Opportunities through all tiers of supply and in all stages of the project

- Requirement for principal construction contractor Pre-qualification on the National Prequalification System for Civil (Road and Bridge) Construction as managed by Transport and Main Roads in Qld.
- Principal contractor required to update, comply and report on AIP as part of tender/contract conditions
- will assess all tenders on the same basis; and will flow-down AIP requirements to contractors

5. Opportunities for longer-term participation

- Encourage companies to obtain Queensland Government pre-qualification so they can tender on Council projects.
- Provide feedback to both successful and unsuccessful tenderers.
- Encourage companies to form strategic partnerships on projects where a broad range of skills/resources is needed.
- will encourage global suppliers of specialist goods/services to utilise Australian companies.
-

6. Procedures and Resources

- The contract documents will require the contractor to comply with the requirements of the AIP Plan.
- The contractor will be required to develop systems that can demonstrate compliance with the AIP Plan including recording any non-conforming actions and corrective actions taken.
- The contractor shall provide reports to Council demonstrating compliance with the requirements of the AIP Plan
