Australian Trade Remedies Commission

Dumping Commodity Register

Aluminium windows and doors

Goods Exported from:

Country	Measure	Date Measures Imposed	Date Measures Expire	Last Anti-Dumping Notice
China	DSA/CSA	15 October 2026	TBA	2026/147

This page contains a link to the latest notice. Note that a reference to the 'date measures imposed' is a reference to the date of publication of the original notice. The measures come into effect the day after the date of publication.

All information contained in this document is provided for general information purposes only. While the Australian Trade Remedies Commission has taken due care in preparing the information, the Australian Trade Remedies Commission does not guarantee the accuracy, reliability or completeness of the information contained herein. The Australian Trade Remedies Commission accepts no liability for any loss or damage suffered due to the direct or indirect reliance on the information contained in this document. Interested parties should obtain their own independent professional advice prior to relying on, or making any decisions in relation to, the information provided in this document.

Contents

1. What is the function of the Dumping Commodity Register (DCR)? *3*

2. What types of aluminium windows and doors are subject to anti-dumping measures? *3*

3. What tariff classifications and statistical codes are covered by the anti-dumping measures? *4*

4. How much will an importer have to pay? *4*

5. What is the dumping export price (DXP) and how do I calculate it? *5*

6. What Dumping Specification Number (DSN) do I use and what are the rates for my exporter? *6*

7. What information is needed to complete an import declaration for goods subject to measures? *8*

8. Will dumping securities collected on my imports be converted to measures? *8*

9. What are the key reports and notices linked to the measures on aluminium windows and doors? *8*

10. Residual exporter list *8*

1. What is the function of the Dumping Commodity Register (DCR)?

The Australian Trade Remedies Commission (ATRC) is committed to supporting importers, practitioners and users of the anti-dumping system through providing accessible and up to date information in the DCR.

DCRs provide importers and licensed customs brokers with general guidance and the necessary information to use when lodging an import declaration to clear goods subject to anti-dumping measures.

It is outside the role of the Commission to provide advice on whether specific goods are exempted from or subject to anti-dumping measures. Importers or their agents are required to provide self-assessed information, regarding the goods being imported, in the import declaration.

Interested parties should obtain their own independent professional advice in making any decisions in relation to importing and/or declaring goods subject to anti-dumping measures.

DCRs notify the outcomes of finalised investigations and should be read in conjunction with any relevant current investigations, such as reviews and inquiries. Refer to the Cases page on the website for any current investigation information for this commodity.

2. What types of aluminium windows and doors are subject to anti-dumping measures?

The goods subject to measures include:
Aluminium windows and doors, whether fully or partially assembled, including their frames, panels, and sashes, with or without glass, whether or not thermally broken, whether or not including hardware, up to the following dimensions:

- for window assemblies or partial assemblies (including window frames, panels and sashes), up to and including 3.0 metres high and up to and including 4.0 metres wide; and
- for door assemblies or partial assemblies (including door frames, panels and sashes), up to and including 3.0 metres high and up to and including 7.0 metres wide.

Further Information

"Fully assembled" refers to a complete window or door unit in which all frames and the applicable panels and/or sash are joined together to form a complete and functional window or door assembly, whether or not glazed, whether or not thermally broken, whether or not including hardware.

"Partially assembled" refers to a fabricated aluminium frame, panel, or sash assembly that is supplied individually or connected to other frame, panel, or sash assemblies, where the combination does not yet form a complete window or door unit, whether or not glazed, whether or not thermally broken, whether or not including hardware.

Exclusions

Excluded are curtain wall products.

Tariff Concession Orders (TCOs)
Goods subject to Tariff Concession Orders (TCOs) imported into Australia will be automatically exempt from dumping duty and/or countervailing duty. For more information on this exemption, refer to ADN 2026/135 and its accompanying fact sheets.

Please Note:

- When importing goods into the country importers are required to self-assess whether the goods meet the goods description outlined above and whether the anti-dumping measures description apply.
- Australian Trade Remedies Commission is not in a position to provide advice on whether certain goods meet the description above.
- The use of exemption types is subject to monitoring by the Australian Trade Remedies Commission and the Australian Border Force.

3. What tariff classifications and statistical codes are covered by the anti-dumping measures?

Goods subject to measures should be classified using the classification and associated statistical codes below:

Tariff Classification	Statistical code
7610.10.00	12

These tariff classifications and statistical codes may apply to goods which are not subject to measures, may change because of amendments to the Working Tariff or the subject goods may be imported under tariff classification numbers that are not listed.

The listing of this tariff classification and statistical code is for convenience or reference only and does not form part of the goods description. Please refer to the goods description for authoritative detail regarding goods subject to measures.

Where importers are unclear on the correct tariff classification of their goods, it is recommended they check the Working Tariff page on the ABF website or contact the ABF on 131 881.

4. How much will an importer have to pay?

DSA (Ad Valorem)

DSA is in the form of an ad valorem measure. The total DSA liability is calculated by multiplying the dumping export price (DXP) by the applicable DSA ad valorem duty rate.

CSA
The CSA or countervailing securities (CSA) liability is calculated by multiplying the DXP by the CSA ad valorem duty rate

Example of how to calculate the DSA liability

Ad valorem measure
The following is an **example** of how to calculate the DSA liability.

- DXP = AUD $1,000 (Free-On-Board (FOB), cash)

- DSA ad valorem rate = 10%

Total DSA liability
The DXP ($1,000) multiplied by the DSA ad valorem rate (10%) - $1,000 x 10% = $100

5. What is the dumping export price (DXP) and how do I calculate it?

The DXP refers to the actual export price of the exported goods. The DXP should reflect the total export (invoice) price of the goods being entered, not the unit price of the goods.

The DXP should be recorded on the relevant Full Import Declaration for the goods in the same terms as the export terms for the goods. Calculating the DXP may involve adjusting the actual export invoice price of the goods to the terms specified.

For example, if the export terms are "FOB, cash" and the actual invoice terms of the goods are "CIF, 60 days, packed", the following adjustments will need to be made in order to calculate the DXP at FOB, cash level.

- step 1 - an adjustment for interest on credit terms will need to be made; and
- step 2 - the overseas freight and insurance components will need to be subtracted from the export invoice price.

Where suitable evidence cannot be proffered by the importer of the interest rate, then 1.0% per month (0.033% per day) should be applied to the actual invoice price credit terms.

An example of adjusting for credit and incoterms is provided below:

- Invoice terms = CIF, 60 days
- Specified terms = FOB, cash
- Marine insurance and ocean freight amount = $100

Step 1 - adjust for credit terms

1. 1% per month interest rate should be applied to the invoiced price credit terms (i.e. 30 days = 1%)
2. If the invoiced CIF, 60 days price is $1,000, then the CIF, cash price = $980 ($1,000 less 2%)

Step 2 - adjust for incoterms

3. Adjust for freight and insurance to calculate DXP at FOB, cash equivalent
4. CIF, cash price of $980 minus freight and insurance amount of $100 = $880

The DXP price = $880 FOB, cash.

6. What Dumping Specification Number (DSN) do I use and what are the rates for my exporter?

The following DSNs apply to goods exported from China entered for home consumption on or after **15 October 2026**:

Exporter Name	CCID	DSN	MEASURE TYPE	DSA	CSA	Effective Rate of Duty	Export Price terms
CHINA							
Altop Facade Co., Ltd	CJR4663939K	340	Exempt				
Foshan AMJ Windows and Doors Co., Ltd	CJN7497993M	341	DSA Ad valorem	5.3%	N/A	5.3%	FOB, Cash
Guangdong Yuanjiang Facade Co Ltd	CCH9976466R	342	DSA Ad valorem	34.8%	N/A	34.8%	FOB, Cash
Zhuhai Yipeng Technology Co., Ltd	CHP6974439X	343	DSA Ad valorem	51.6%	N/A	51.6%	FOB, Cash
Broad Windows and Doors and Curtain Wall System Co., Ltd	CJM7696446H	344	DSA Ad valorem	24.4%	N/A	24.4%	FOB, Cash
Guangdong Kete Facadetech Co., Ltd	CFR6697663X	345	DSA Ad valorem	12.1%	N/A	12.1%	FOB, Cash
Residual exporters (see page 8, 9, 10)		346, 347, 348	DSA Ad valorem	24.4%	N/A	24.4%	FOB, Cash
All Other Exporters		349	DSA& CSA Ad valorem	70.4%	2.9%	73.3%	FOB, Cash

Please note:

- How do I lodge an entry for goods subject to dumping security?

In order to lodge an import declaration for goods subject to securities the importer or their broker must obtain a Security ID. The security is in the form of an undertaking or promise to pay should the Minister decide to impose measures at the completion of the investigation. The National Temporary Imports and Securities (NTIS) section of the Australian Border Force manages the operation of securities and granting of a Security ID. Importers/brokers will need to complete and submit a dumping security undertaking form when lodging an import declaration for goods subject to the securities. To obtain the application form and further instructions refer to the ABF temporary imports page. Information regarding this can also be found in the DCR.

- Goods on Water
  Goods which have left the country of export prior to the date of securities imposed may be subject to a Goods on the Water DSN removing the requirement for a security ID. To request a Goods on Water DSN, the importer must submit the Bil of Lading with a “shipped on board” date prior to the securities imposed date, showing the goods and provide the Tariff and Stat code(s) relating to the shipment to clientsupport@atrc.gov.au

7. What information is needed to complete an import declaration for goods subject to measures?

The information required by an importer or Customs broker to complete an import declaration for goods subject to DSA is:

- DXP;
- Dumping Specification Number (DSN) or exemption type (where appropriate);
- Country (this is usually country of origin or export country);
- Tariff classification and statistical code;
- Exporter / supplier; and
- Quantity.

Please see tables in Question 6 to determine which DSN applies to the exporter of your goods.

8. Will dumping securities collected on my imports be converted to measures?

Securities taken in will be either cancelled or converted to IDD.

The ABF will contact each affected importer/broker and provide relevant cancellation and/or conversion instructions for each consignment subject to security undertakings.

9. What are the key reports and notices linked to the measures on aluminium windows and doors?

Date Published	Description	Report	ADN
14 October 2026	Securities imposed on China	PAD	2026/147
