1. What is the function of the Dumping Commodity Register (DCR)? 3

2. What types of Zinc Coated (Galvanised) Steel are subject to anti-dumping measures? 3

3. What tariff classifications and statistical codes are covered by the anti-dumping measures? 4

4. How much Interim Dumping Duty (IDD) will an importer have to pay? 6

5. What is the dumping export price (DXP) and how do I calculate it? 7

6. What Dumping Specification Number (DSN) do I use and what are the rates for my exporter? 8

7. How do I find out the confidential rate and ascertained export price for my exporter? 13

8. What information is needed to complete an import declaration for goods subject to measures? 13

9. What are the duty assessment importation and application period dates? 13

10. DCR changes including links to key reports and notices for measures on Zinc Coated (Galvanised) Steel? ... 15

1. What is the function of the Dumping Commodity Register (DCR)?

The Australian Trade Remedies Commission (ATRC) is committed to supporting importers, practitioners and users of the anti-dumping system through providing accessible and up to date information in the DCR.

DCRs provide importers and licensed customs brokers with general guidance and the necessary information to use when lodging an import declaration to clear goods subject to anti-dumping measures.

It is outside the role of the Commission to provide advice on whether specific goods are exempted from or subject to anti-dumping measures. Importers or their agents are required to provide self-assessed information, regarding the goods being imported, in the import declaration.

Interested parties should obtain their own independent professional advice in making any decisions in relation to importing and/or declaring goods subject to anti-dumping measures.

DCRs notify the outcomes of finalised investigations and should be read in conjunction with any relevant current investigations, such as reviews and inquiries. Refer to the Cases page on the website for any current investigation information for this commodity.

2. What types of Zinc Coated (Galvanised) Steel are subject to anti-dumping measures?

The goods subject to measures include:

- Flat rolled products of iron and non-alloy steel;
- alloyed steel is included for exports from India, Malaysia and Vietnam and for the following exporters from China:
    - Angang Steel Co. Ltd;
    - Benxi Iron and Steel (Group) International Economic and Trading Co.; and
    - Yieh Phui Enterprise Co. Ltd.
- Plated or coated with zinc;
- Whether or not surface treated including combinations of surface treatments; and
- Any width.

The following are *excluded* from measures, exemption type "GOODS" applies:

- Painted or pre-painted (including colorbond).
- Steel, flat rolled, non-alloy, hot dipped galvanized, in lengths meeting the description detailed in Ministerial Exemption Instrument No 4 of 2015
- Coils, non-alloy steel, hot rolled, zinc coated complying with ASTM A653/A653M-11 or ASTM A653/653M-20 meeting the description detailed in Ministerial Exemption Instrument No 2 of 2021
- Hot dipped zinc-aluminium-magnesium alloy coated steel coils meeting the description detailed in Ministerial Exemption Instrument No 2 of 2022

Anti-dumping measures do not apply to goods subject to the following Tariff Concession Orders (TCOs). Description of goods subject to these TCOs can be located on the Australian Border Force website and may be entered using the Dumping Exemption type 'GOODS'.

TCO Number	Date of effect	Ministerial Exemption Certificate
TC 1242989	6 February 2013	No 1 of 2013 dated 25 July 2013
TC 1328432	18 December 2013	No 2 of 2014 dated 11 June 2014
TC 1663110	10 March 2017	No 8 of 2017 dated 9 August 2017
TC 1750287	6 August 2017	No 3 of 2018 dated 22 May 2018

For more information about the description of the goods subject to measures, refer to Final report REP 190 and REP 370.

Tariff Concession Orders (TCOs)

Goods subject to Tariff Concession Orders (TCOs) imported into Australia will be automatically exempt from dumping duty and/or countervailing duty. For more information on this exemption, refer to TRN 2026/135 and its accompanying fact sheets.

Please Note:

- When importing goods into the country importers are required to self-assess whether the goods meet the goods description outlined above and whether the anti-dumping measures description apply.
- Australian Trade Remedies Commission is not in a position to provide advice on whether certain goods meet the description above.
- The use of exemption types is subject to monitoring by the Australian Trade Remedies Commission and the Australian Border Force.

3. What tariff classifications and statistical codes are covered by the anti-dumping measures?

Goods subject to measures should be classified using the classification and associated statistical codes below:

Tariff Classification	Statistical code
7210.49.00	55, 56, 57 and 58
7212.30.00	61
7225.92.00*	38*
7226.99.00*	71*

***** these Tariff Classifications only apply to the following exporters/suppliers:

- All exporters from India, Malaysia and Vietnam
- Angang Steel Co. Ltd (China);
- Benxi Iron and Steel (Group) International Economic and Trading Co. (China); and
- Yieh Phui Enterprise Co. Ltd (Taiwan).

These tariff classifications and statistical codes may apply to goods which are not subject to measures, may change because of amendments to the Working Tariff or the subject goods may be imported under tariff classification numbers that are not listed.

The listing of this tariff classification and statistical code is for convenience or reference only and does not form part of the goods description. Please refer to the goods description for authoritative detail regarding goods subject to measures.

Where importers are unclear on the correct tariff classification of their goods, it is recommended they check the Working Tariff page on the ABF website or contact the ABF on 131 881.

4. How much Interim Dumping Duty (IDD) will an importer have to pay?

IDD (Combination) - all exporters (except Dongkuk Steel Mill, Ta Fong Steel, Sheng Yu Steel, Shandong Guanzhou Dingxin Plate Technology, POSCO, Hoa Sen Group, Nam Kim Steel Dongbu Steel Co Ltd and all exporters from Korea and Vietnam)

IDD is in the form of a fixed and variable measure. The total IDD liability is calculated as follows:

- fixed component of IDD: dumping export price (DXP) or ascertained export price (AEP), whichever is the greatest, multiplied by the applicable IDD ad valorem duty rate; **plus**
- variable component of IDD: the amount, if any, by which the DXP is lower than the AEP.

IDD (Floor Price) - Shangdong Guanzhou Dingxin Plate Technology, Guanxian HongShun Composite Material Co Ltd, Chung Hung Steel Corporation, Prosperity Tieh Enterprise Co. Ltd, and all exporters from Vietnam and Korea

IDD is in the form of a floor price measure. The total IDD liability is the amount, if any, by which the DXP is lower than the floor price.

ICD all exporters, China & India (except Jiangyin Zongcheng & Shandong Guanzhou Dingxin Plate Technology)

The ICD liability is calculated by multiplying the DXP by the ICD ad valorem duty rate.

Example of how to calculate the IDD liability

Combination of Fixed and Variable measures

The following is an **example** of how to calculate the IDD fixed and variable liability.

- DXP = AUD $1,000 (Free-On-Board (FOB), cash)
- AEP = AUD $2,000 (FOB, cash)
- IDD ad valorem rate = 10%

Fixed component of IDD:
The higher of the DXP ($1,000) or AEP ($2,000) multiplied by the IDD ad valorem rate (10%)
$2,000 x 10% = $200

Variable component of IDD:
The amount, if any, by which the DXP ($1,000) is lower than the AEP ($2,000)
$2,000 - $1,000 = $1,000

Total IDD liability: $1,200 ($200 + $1,000)

5. What is the dumping export price (DXP) and how do I calculate it?

The DXP refers to the actual export price of the exported goods. The DXP should reflect the total export (invoice) price of the goods being entered, not the unit price of the goods.

The DXP should be recorded on the relevant Full Import Declaration for the goods in the same terms as the export terms for the goods. Calculating the DXP may involve adjusting the actual export invoice price of the goods to the terms specified.

For example, if the export terms are "FOB, cash" and the actual invoice terms of the goods are "CIF, 60 days, packed", the following adjustments will need to be made in order to calculate the DXP at FOB, cash level.

- step 1 - an adjustment for interest on credit terms will need to be made; and
- step 2 - the overseas freight and insurance components will need to be subtracted from the export invoice price.

Where suitable evidence cannot be proffered by the importer of the interest rate, then 1.0% per month (0.033% per day) should be applied to the actual invoice price credit terms.

An example of adjusting for credit and incoterms is provided below:

- Invoice terms = CIF, 60 days
- Specified terms = FOB, cash
- Marine insurance and ocean freight amount = $100

Step 1 - adjust for credit terms

1. 1% per month interest rate should be applied to the invoiced price credit terms (i.e. 30 days = 1%)
2. If the invoiced CIF, 60 days price is $1,000, then the CIF, cash price = $980 ($1,000 less 2%)

Step 2 - adjust for incoterms

3. Adjust for freight and insurance to calculate DXP at FOB, cash equivalent
4. CIF, cash price of $980 minus freight and insurance amount of $100 = $880

The DXP price = $880 FOB, cash.

6. What Dumping Specification Number (DSN) do I use and what are the rates for my exporter?

The following DSNs apply to goods exported from India, Malaysia and Vietnam entered for home consumption on or after **17 August 2022**:

Exporter Name	CCID	DSN	Measure	Measure Type	Effective Rate of Duty	Ascertained Export / Floor Price (per Tonne)	Export Price terms

All Other Exporters		137	IDD	Floor Price	N/A	Confidential	FOB, cash

Please Note:

- AEP are considered confidential. Please see below on how importers can request the rates.
- The actual duty liability may be higher than the rate of duty published due to the variable component of IDD.

7. How do I find out the confidential rate and ascertained export price for my exporter?

The IDD ad valorem rate, floor price and the AEP for each DSN are considered confidential and will not be published. Importers of these goods may be provided with the confidential IDD and the AEP, however the onus is on the importer to substantiate their commercial relationship with an exporter/supplier of their goods by providing evidence of:

- A previous trading history with a nominated exporter/supplier of the goods. Evidence of a trading history would take the form of at least commercial invoices, packing list and bills of lading from previous shipments. Additional documentation may be requested by the Commission; or
- In the absence of a trading history, an offer or a quotation from an exporter/supplier of goods subject to dumping/countervailing measures. The offer or quotation must be on the exporter/supplier's company letterhead.

Requests and evidence should be sent to clientsupport@atrc.gov.au

Please note:

- Any requests for the confidential information that do not include sufficient evidence as outlined above will be rejected.
- Only as much of the confidential information as is necessary to enter the goods will be provided.

8. What information is needed to complete an import declaration for goods subject to measures?

The information required by an importer or Customs broker to complete an import declaration for goods subject to IDD/ICD is:

- DXP;
- Dumping Specification Number (DSN) or exemption type (where appropriate);
- Country (this is usually country of origin or export country);
- Tariff classification and statistical code;
- Exporter / supplier; and
- Quantity.

Please see tables in Question 6 to determine which DSN applies to the exporter of your goods.

9. What are the duty assessment importation and application period dates?

An importer of goods on which an IDD has been paid, may lodge an application with the Commissioner requesting that the Minister make an assessment of the final liability of those goods to duty.

This usually occurs when an importer considers that the IDD paid in respect of goods exceed the total amount payable (i.e. importers consider they are entitled to a refund of duties). In relation to IDD, an importer may consider that the dumping margin for the goods is now less than it was during the investigation period, or that its exporter is no longer dumping, and as a result it has paid more duty than it should have paid.

There are a series of time frames fixed by legislation that govern the duty assessment system (referred to as importation periods).

The duty assessment importation periods and application dates for **China, Taiwan and Korea** are:

Importation Period	Application Period
5 August 2023 – 4 February 2024	5 February 2024 – 4 August 2024
5 February 2024 – 4 August 2024	5 August 2024 – 4 February 2025
5 August 2024 – 4 February 2025	5 February 2025 – 4 August 2025
