Re: Investigation No. 691 – Aluminium Windows and Doors from China

Dear Commissioner,

Support for Statement of Essential Facts No. 691

I am writing on behalf of Goldco® Security Group Pty Ltd to support the findings in the Statement of Essential Facts No. 691 concerning aluminium windows and doors exported from China.
Goldco® Security is a Gold Coast manufacturer that has manufactured and installed security screens, screen doors and flyscreens since the 1980s, supplying homeowners and businesses throughout the Gold Coast and northern New South Wales.

All our security screen products are registered as Australian-made, and we use Australian-made aluminium extrusions supplied by Capral Aluminium. Our commitment to Australian manufacturing extends beyond our own factory to the local suppliers and businesses that support our operations. Our work involves the installation of screens to Australian-manufactured aluminium doors and windows. Although we manufacture screens rather than aluminium windows and doors, our business depends directly on a strong and competitive Australian window and door manufacturing industry.

We also frequently encounter imported Chinese windows and doors that are incompatible with Australian security screen systems, preventing us from fitting security screens using our standard installation methods. In nearly all such cases, the homeowner is either left without a security screen or faces significantly higher costs to have the window or door system modified to accommodate one. In our experience, this incompatibility creates practical difficulties and additional costs for homeowners seeking to secure their properties.

We support the Commissioner's preliminary findings that aluminium windows and doors exported from China were dumped, that the Australian industry suffered material injury caused by dumped and subsidised imports, and that dumping and subsidisation may continue.

Australian manufacturers should be able to compete on quality, service, compliance, capability and price on fair terms. The viability of local window and door manufacturing also supports businesses such as ours, along with Australian extrusion producers, component suppliers and the people employed throughout this supply chain.

Goldco Security Group Pty Ltd

We therefore support the imposition of effective measures that address the injurious effects of dumping and subsidisation of Chinese products, to allow Australian manufacturers to compete on a fair and sustainable basis.

We also support the efforts of the Australian Glass and Window Association (AGWA) and the Australian industry applicants, and AGWA continuing to represent Australian industry for the remainder of the investigation.

We encourage the Commission to ensure the final measures provide meaningful and lasting support for fair competition and the future of Australian manufacturing.

Yours sincerely,

Anthony Bialocerkowski
General Manager
