

Review of Measures/Revocation Review No 667

Aluminium extrusions Exported from Malaysia by PMB Aluminium Sdn Bhd

Note for file - 27 October 2026

On 28 March 2025, the Commissioner of the Australian Trade Remedies Commission¹ (the Commissioner) initiated this review of anti-dumping measures applying to certain aluminium extrusions (the goods) exported to Australia from Malaysia by PMB Aluminium Sdn Bhd (PMBA) (Review 667) following the receipt of an application from PMBA.² This review is examining whether the measures are no longer warranted and whether the variable factors relevant to the taking of the anti-dumping measures have changed. The Commissioner resumed this review on 19 June 2026 following its suspension pending court proceedings.³

At initiation, the Commissioner established a review period of 1 April 2024 to 31 March 2025 (initial review period). On 3 August 2026, having considered submissions in response to the resumption of Review 667, the Commissioner revised the review period to 1 April 2025 to 31 March 2026 (revised review period) and issued new questionnaires.⁴

The Australian Trade Remedies Commission (Commission) has received information covering both periods from PMB Aluminium Sdn Bhd (PMBA), PMAA and Capral Ltd (Capral). The Commission also received submissions from PMAA and Capral on how the Commissioner should use that information in conducting the review.

This file note is to inform interested stakeholders as to how the Commission will use the information related to each period and details about the Commission's verification activities.

In examining whether the measures are no longer warranted, the Commission will consider all information available to the Commission, including the information related to both the initial review period *and* revised review period to the extent that the information is reliable and relevant. The Commission will also consider other historical evidence from previous reviews and inquires to the extent that information is relevant.

¹ On the 29 September 2026, the name of the Anti-Dumping Commission was changed to the Australian Trade Remedies Commission.

² Anti-Dumping Notice (ADN) No 2025/026 (initiation of review 667) and Addendum to ADN No 2025/026 refer.

³ ADN No 2026/011 (suspension of review 667) and ADN 2026/082 (resumption of review 667 and extension of time) – see EPR 667, items 13 and 14.).

⁴ ADN No 2026/082 (revision to review period, new questionnaire) – see EPR 667, item 20.

If the Commissioner does not make a revocation recommendation in relation to the measures, the Commissioner will consider whether the notice should be altered in relation to PMBA having regard to variable factors calculated using information from the revised review period (i.e. 1 April 2025 to 31 March 2026) as this is the most contemporary period. Accordingly, the Commission will focus its verification activities on the information related to the revised review period. The Commission may also seek to verify the reliability of other information provided, on an as needed basis.

The Commission will consider all relevant information and will make its findings in accordance with the requirements of the Customs Act 1901 and the applicable legislative framework.
