CASE 691

Aluminium windows and doors exported from the People’s Republic of China

Response to the Statement of Essential Facts - public record version

1. Parties

Trader/exporter: Yining Haijiang International Business Co., Ltd. Producer: Foshan Jingqi Doors and Windows Co., Ltd. Australian importer/customer: Delta Facade Pty Ltd.

[Personal contact details and identifiers omitted. Summary: the submission identifies authorised company contacts and legal registration information.]

2. Purpose and request

The parties respectfully respond to the Statement of Essential Facts for Case 691 and thank the Commission for the opportunity to provide supplementary material. They apologise that a response was not lodged by the original preliminary information request deadline because the questionnaire notification was not received at the relevant time.

The parties request that the Commission consider the evidence in its final findings and apply the treatment it considers legally appropriate to cooperative parties.

3. Material facts

Bill of Lading WL25060751 records the goods as laden on board on 26 June 2025, within the investigation period. The Australian import entry was processed in July 2025.

The evidence records one export sale of 82 sets from China to Australia. The producer VAT invoice records 81 invoiced sets because one additional unit was supplied as a replacement for a previously damaged unit and was not separately invoiced.

[Exact prices, payment amounts, bank account details, receipt numbers and personal contact details omitted. Summary: domestic payments reconcile to the producer invoice total, and Australian payments reconcile to the export sales value. One Australian remittance also included payment for a separate later project; only the portion corresponding to this shipment is allocated here.]

4. Evidence supplied in the sensitive version

Corporate	Business licences and signed declarations for the trader/exporter and producer
Producer-trader	Domestic production contract, producer VAT invoice and two domestic bank payments
Export sale	Export sales contract and Chinese export declaration for 82 sets
Shipping	Bill of lading identifying shipper, consignee, container and 26 June 2025 on-board date
Australian entry	Australian import declaration identifying the same shipment and 82 units
Payment	Australian remittance evidence and allocation reconciliation

The parties are willing to provide supporting accounting, sales, production and bank records, translations and verification access if requested.

CASE 691

Aluminium windows and doors exported from the People’s Republic of China

Evidence summary

This document provides a public-record summary of the confidential exhibits supplied with the Case 691 response.

Signed company declarations	Authorised representatives confirm the trader/exporter and producer roles, the identified shipment and their willingness to cooperate.
Domestic contract and VAT invoice	The producer supplied aluminium windows and doors to the trader/exporter under the referenced domestic order. Commercial prices are confidential.
Domestic bank receipts	Two payments - a deposit and balance - reconcile to the producer invoice total. Bank identifiers are confidential.
Export contract and customs declaration	The records identify an export sale of 82 sets to Australia. Exact prices are confidential.
Bill of lading	Shipment WL25060751, container TGHU6966370, was laden on board on 26 June 2025 for Melbourne.
Australian import declaration	The Australian entry identifies the same commercial shipment and 82 units.
Australian remittances	Two remittances settle the export invoice. The second remittance also covers a separate later project; only the shipment balance is allocated to this transaction. Amounts and banking details are confidential.
Quantity difference	The export records show 82 sets; the producer invoice shows 81 sets because one additional unit was a no-charge replacement for a previously damaged unit.

Where confidential material has been omitted, the summary states the nature of the information and its relevance without disclosing commercially sensitive details.
