Re: Investigation No. 691 – Aluminium Windows and Doors from China

Dear Director,

Support for Statement of Essential Facts No. 691

I am writing on behalf of Byron Glass & Aluminium Pty Ltd an Australian manufacturer and fabricator of aluminium windows and doors operating in New South Wales

We support the findings in Statement of Essential Facts No. 691 and the ongoing efforts of the Australian Glass and Window Association (AGWA) and the Australian industry applicants to achieve a fair and level playing field for Australian manufacturers.

In particular, we support the Commissioner's preliminary findings that aluminium windows and doors exported from China were dumped, that the Australian industry has suffered material injury as a result of dumped and subsidised imports, and that dumping and subsidisation may continue.

As an Australian fabricator, we believe Australian manufacturers are capable of supplying aluminium windows and doors across a broad range of residential and commercial applications. We support the finding that the Australian industry is not confined to Class 1 buildings and supplies products across Class 1 to Class 9 buildings.

Our experience is that Australian manufacturers are prepared to compete on quality, service, compliance, capability and price. However, that competition needs to occur on fair terms. Our concern is therefore not simply about where products are manufactured. It is about having a fair and competitive market where Australian businesses can continue to manufacture, fabricate and supply products without being disadvantaged by unfairly priced imports.

This has put pressure on our own business. We have increasingly had to source imported products ourselves to remain competitive and continue winning work in our region. This is not necessarily our preferred option, but it has become part of the commercial reality of competing in the current market.

CONFIDENTIAL COMMERCIAL INFORMATION PROVIDED TO THE COMMISSION

We support effective and durable anti-dumping measures where the evidence establishes that they are warranted. I believe Australian manufacturers and businesses should have a fair opportunity to compete, while still allowing businesses such as ours access to imported products where they are needed to remain commercially viable.

We also support AGWA continuing to represent the interests of Australian fabricators through the remainder of this investigation and in responding to the matters arising from the SEF.

This investigation is important to our business and to the future competitiveness of Australian window and door manufacturing. We encourage the Commission to ensure that the final measures provide a meaningful and durable level playing field for Australian industry.

Yours sincerely,

Paul Bright
