Re: Investigation 691 – Statement of Essential Facts

Dear Commissioner

Clark Windows Tasmania Pty Ltd is an Australian manufacturer of aluminium-framed glass windows and doors, with manufacturing operations in Smithton and Launceston, Tasmania.

We previously provided our support for the application that led to Investigation 691 and, having considered the Statement of Essential Facts, we wish to reaffirm that support. As an Australian manufacturer of the goods covered by this investigation, Clark Windows Tasmania supports the Commission's preliminary findings that dumped imports from China have caused material injury to the Australian industry and supports the introduction of appropriate measures to address that injury.

Our business represents significant Australian manufacturing capability. For a manufacturer such as ours, the importance of this investigation is straightforward. Australian manufacturers should be able to invest in local production and compete in the Australian market on a fair commercial basis. Anti-dumping measures are not intended to prevent competition or imports. They are intended to address the injury caused where goods are exported to Australia at dumped prices.

We therefore support the overall direction of the findings in the Statement of Essential Facts and the imposition of effective measures that address the dumping and injury identified by the Commission. Clark Windows Tasmania also supports the continued involvement of the Australian Glass and Window Association and the Australian industry applicants through the remainder of Investigation 691.

Yours sincerely
David Nibbs

Operations Manager
Clark Windows Tasmania Pty Ltd
