Commissioner of the Australian
Trades Remedies Commission

Dear Commissioner of the Australian Trades Remedies Commission,

Application seeking an exemption from anti-dumping measures

Pyrovista Pty Ltd would like to seek an exemption from anti-dumping measures that might apply to certain good – such as Flame Zone doors and windows in residential dwellings built/located in Bushfire prone situations and scenarios. Our details are as follows

Pyrovista Pty Ltd (ABN 72695084612)
Nurralee
2263 Tarana Road
GEMALLA, NSW, 2795 (Both postal and street address)

The details of the contact person for this application are as follows: -
Frank Thorvaldsson
Director
0415 332 870
info@pyrovista.com.au

The exemption goods

The goods are bush fire, flame zone rated, aluminium - steel core- framed windows (HS 76101000)

Applicant's interest as an affected party

Pyrovista Pty Ltd is an importer and supplier of Pyrovista Flame Zone Windows and Doors, for residential dwellings being built in Flame Zone designated areas right around Australia. These goods are used because there are no other products in the Australian market that currently is able to supply them at an affordable price and made with the rigour of an aluminium frame with a steel core insert filled with special heat absorbing foam. In addition, the product is available in various frame widths, from 56mm to 85mm. Depending on the customers' needs. Glass is double glazed with a total thickness of 16mm. The product has been tested here in Australia, and complies to and exceeds Australian Standard AS1530.8.2 and AS 3959 for Bal FZ.

Currently, we offer casement windows, fixed windows and awning windows. We are also working on a tilt turn window. In the doors offering we have French doors, single and double, both in inwards and outwards modes. We are also working on a sliding door.
All our windows and doors meet stringent Australian standards and are entirely bespoke and made to measure as well as being available in many colours.

We do not do “off the shelf modular” ready-made windows at all!

Details of other parties likely to possibly have an interest in this exemption application and their possible interest in this application.

The industry is in its infancy as building a residential dwelling in a Flame Zone area comes with additional costs and expenses. There are four or five current suppliers of Bal FZ windows and doors. Only ONE appears to be offering Bal FZ aluminium windows and doors. Xferno Bal FZ Aluminium systems. However, the products are not the same, though similar. The Pyrovista system has the additional steel insert in the frames and the heat absorbing foam. In addition, the Pyrovista system appears to be much more competitively priced and has much better energy efficiencies in the glass as well a having a larger range of options in windows and doors and colours thereof.

Grounds on which we are seeking the exemption

We are seeking an exemption on the ground one, in that there are no suppliers of like or directly available goods and are not offered for sale in Australia to all purchasers on equal terms under like conditions having regard to the custom and usage of trade and that no equivalent suitable goods are manufactured in Australia.

Evidence of Known Australian producers have been contacted in writing and asked whether or not they can manufacture and supply goods .

We contacted the four other suppliers of BAL FZ windows (emails attached) responses were received from two, the other two did not respond. A perusal of their websites indicate that they do not manufacture or supply the products we wish to be able to.

Detailed statement setting out reasons for seeking exemption

The product, (BAL FZ windows, with steel reinforced aluminium frame), we wish to have exempted is not currently available in Australia. The product has been tested, here in Australia, (Jensen-Hughes) against Australian Standard AS1530.8.2 and AS 3959 for Bal FZ and exceeded expectations.
We have, and still are, continuing to explore better and more options in the BAL FZ, Australian compliant, range of windows and doors with ongoing research, development and further testing. Our aim is to be able to continue to offer our products at a most competitive price, Australia wide.

There are no other suppliers of Bal FZ compliant windows and doors that offer aluminium framed that are steel reinforced in Australia.

Thanking you

Yours sincerely
