Australian Trade Remedies Commissioner

Re: Anti-Dumping Case 691 - Aluminium windows and doors from China

Dear Commissioner,

Our business cannot survive if the prices we need to cover Australian materials, labour and running costs are consistently undercut by imported windows and doors.

We manufacture aluminium windows and doors in Eumemmerring, Victoria. This is the main part of our business.

We regularly lose work to cheaper imported windows and doors. We need our prices to cover what it actually costs to manufacture here. If we cannot recover those costs, we cannot keep the business going.

This is already affecting the work we can provide to people. We have had to stop using a subcontractor because of work lost to cheaper imports. Supporting details are included in the confidential section below.

The SEF's discussion of lost sales reflects what we are experiencing. For us, losing a job means less work coming through the factory and fewer opportunities to keep people working.

CONFIDENTIAL

Fairer competition would help us give our Australian team more work and operate more efficiently. We want to continue manufacturing in Australia, but we need a fair opportunity to win work at prices that cover our costs.

Please consider the practical impact on small manufacturers like ours when deciding the outcome of Case 691. If these conditions continue, I am concerned we will lose our business.

Yours sincerely,

Morteza Mohammadi
Director and Owner
