Re: Investigation No. 691 – Aluminium Windows and Doors from China

Dear Director,

Support for Statement of Essential Facts No. 691

I am writing on behalf of SMK Glass projects PTY LTD an Australian manufacturer/fabricator of aluminium windows and doors operating in Sydney NSW

We support the findings in Statement of Essential Facts No. 691 and the ongoing efforts of the Australian Glass and Window Association (AGWA) and the Australian industry applicants to achieve a fair and level playing field for Australian manufacturers.

In particular, we support the Commissioner's preliminary findings that aluminium windows and doors exported from China were dumped, that the Australian industry has suffered material injury as a result of dumped and subsidised imports, and that dumping and subsidisation may continue.

As an Australian fabricator, we believe Australian manufacturers are capable of supplying aluminium windows and doors across a broad range of residential and commercial applications. We support the finding that the Australian industry is not confined to Class 1 buildings and supplies products across Class 1 to Class 9 buildings.

Our experience is that Australian manufacturers are prepared to compete on quality, service, compliance, capability and price. However, that competition needs to occur on fair terms.

I am not a major business with office staff and a admin staff who can tye up these sort of emails and make it sound as professional as possible I am simply a small Australian owned and operated business who does his paperwork and quoting late at night and runs the business during the day,

CONFIDENTIAL COMMERCIAL INFORMATION PROVIDED TO THE COMMISSION

We are constantly called back to jobs to finish after another contractor or to repair faulty windows, a largeportion of these windows being Chinese. But I strongly believe the Chinese imports which are forcing the industry in ausralia to slash costs in order to win jobs is causing quality to drop dramatically from non compliant frames not meeting wind loads/ or basix requirements, doors that are rated for max 2.4m panel sizes being installed 3 and 3.2m high simply to cut custs on aluminium. The cheapo Chinese knock offs are not only effecting Australian manufacturing but also the end home owners.

We therefore support the imposition of effective measures that address the injurious effects of dumping and subsidisation and allow Australian manufacturers to compete on a fair and sustainable basis.

We also support AGWA continuing to represent the interests of Australian fabricators through the remainder of this investigation and in responding to the matters arising from the SEF.

This investigation is important to our business and to the future competitiveness of Australian window and door manufacturing. We encourage the Commission to ensure that the final measures provide a meaningful and durable level playing field for Australian industry.

Yours sincerely,

Hussain Kasser
