MUJOY慕森

Case 691 – Written Submission

1.Company Information

- Company Name: Guangdong MUJOY International Home Co., Ltd.
- Date of Incorporation: [2025.11.03]
- Registered Address: [Room 1213 & 1214, 12th Floor, Huachang Building, No.73 Lingnan Road, Dali Town, Nanhai District, Foshan City]
- Ownership & Relationship: MUJOY HOME acts solely as an export trading entity and does not manufacture aluminium windows and doors. The products are manufactured by our associated factory, Ronggao Aluminium. MUJOY HOME purchases finished aluminium windows and doors from Ronggao Aluminium for export sales.
- Core Business: Sales and export of aluminium windows, doors, sunrooms, wall panels and whole-house custom furniture.
- Statement: During the investigation period (1 July 2024 – 30 June 2025), our company had no sales, orders, bills of lading or customs records exporting aluminium windows and doors to Australia. We are a new exporter with no prior business in the Australian market.

2. Product Description

Our products are windows, casement doors, sliding doors and hidden doors fabricated from extruded 6063-T5 aluminium profiles. The standard wall thickness of profiles is 1.4 mm. Available surface finishes include PVDF powder coating and standard powder coating. The insulated glass units can be configured with K-glass (Low- E glass) combined with clear glass, with thermal break structure. These products fall within the product scope covered by the anti-dumping investigation Case 691.

3. Manufacturing and Purchasing Arrangement

- Manufacturer: Ronggao doors&windows
- Business model: MUJOY HOME places purchase orders with Ronggao doors&windows to buy finished doors and windows under sales contracts. All transactions are settled at arm's length market prices.

- There are no free supplies, subsidies or below-cost transfer pricing between the two parties. Purchase prices are calculated based on raw material cost, labour, coating, glass, hardware and factory overheads.

- Ronggao doors&windows independently sources aluminium billets, glass and accessories for production. MUJOY HOME is responsible for foreign trade sales, export documentation and communication with overseas customers.

4. Cost Structure

The unit cost of our aluminium doors and windows consists of the following items:

- Aluminium raw material (billet cost + extrusion processing fee)
- Profile surface treatment: PVDF powder coating / normal powder coating
- Insulated glass (including K-glass Low- E glass, sealing and spacer bars)
- Hardware components: hinges, gear operators, lock points, rollers, door stops etc.
- Labour for cutting, assembly and quality inspection
- Packaging materials (timber crates, protective film)
- Factory utilities, depreciation and allocated administrative overheads
- Domestic inland freight

  Pricing principle: Selling price = full actual cost + reasonable commercial profit. If we export to Australia in the future, we will not sell at prices below normal value, and we have no intention of dumping.

5. Statement on Government Subsidies

Neither our company nor our manufacturing partner Ronggao Aluminium receives any product-specific government subsidies, export subsidies, tax rebates or special preferential policies related to aluminium window and door production. All raw materials, utilities, factory premises and labour are purchased at market rates.

6. Explanation for not completing the standard exporter questionnaire

The standard exporter questionnaire requires transaction records, customer invoices, bills of lading and sales ledgers for sales into Australia during the investigation period. As MUJOY HOME had no exports to Australia in this investigation period, such transaction documents do not exist. Therefore we are unable to complete the full standard questionnaire. We submit this written submission (in both confidential and non-confidential versions) as an alternative response. We respectfully request the Commission to accept this document as our cooperation with this investigation. We

undertake to cooperate with any reasonable follow-up enquiries, supplementary document requests and verification by the Commission.

7.Undertaking

We declare that all information contained in this submission is true, accurate and complete to the best of our knowledge. Should our company export the subject aluminium windows and doors to Australia in the future, we will maintain complete transaction and cost records and make them available for verification by the Anti-Dumping Commission.
