

# CRAFTING INNOVATION TOGETHER

With help from the Industry Growth Centres Initiative, Perth-based CORE Innovation Hub and its collaborative working spaces are helping innovators in the mining equipment, technology and services (METS) and energy resources sectors innovate, create and sell products, services and technologies.

CORE Innovation Hub (CORE) provides a space for operators, suppliers, researchers, entrepreneurs and startups to connect and collaborate on challenges and opportunities across the energy resources and METS sectors.

METS Ignited and NERA have provided funding, expertise and industry connections to establish and assist development of the innovation hub. CORE's relationship with both Growth Centres has helped accelerate its growth and foster a national focus for its community.

CORE supports a dynamic collaborative and innovative environment through coworking, capacity-building and networking events and its industry-led CORE Skills professional development programs.

CORE helps companies access networks and resources, driving commercialisation efforts and the development of new products and services. Startup businesses such as AiSpanner, Chironix and Soter Analytics have benefited from access to decision makers in the sector and the support provided by CORE. As Matt Hart, founder of Soter Analytics explains, "Being a member of CORE not only gives us access to this facility in the middle of the Perth CBD, but also access to future customers, collaborators and cross-sector networks as we build a global team and business."

After only three years, CORE has more than 80 industry members and collaborators, and reciprocal arrangements with other resources hubs in Santiago, Chile, San Francisco and Houston.

**CORE Innovation Hub is just one of many affiliates engaged with the Industry Growth Centres Initiative across Australia's six growth sectors.**

## BUSINESS FOCUS

CORE INNOVATION HUB

"It's through collaboration that we will be able to continue to drive into the sector and ensure a pipeline of new technologies, new products and new services into the future."

—Tamryn Barker, CEO of CORE Innovation Hub,  
CORE Innovation Hub
