Andy/Chris,

Thank you for your email regarding the above application.

This email is to provide preliminary notification of approval (subject to receipt of your formal application).

Correspondence confirming official approval will follow on Monday.

Do not hesitate to contact me should you require further assistance/clarification.

Regards,

**Dominic Marozzi**

**Subject:** URGENT - Application to Suspend Montara H1 ST-1

Dominic,

Sorry for the short notice this late on a Friday. Attached is a proposed suspension schematic for Montara H1 ST-1. We are currently running the 244mm casing and would like to suspend the well per the attached diagram over the

weekend. It was originally intended to suspend the well with a cement plug per the Drilling Program TM-CR-MON-B-150-00001 Rev 2, however a pressure containing suspension cap for the 244mm casing has become available and as such we are replacing the cement plug with this suspension cap.

A formal application to suspend will be issued later today, however we are seeking verbal approval today to suspend the well over the weekend.

If you have any questions please let me know.

Regards

Chris
