

## NATIONAL STANDARDS COMMISSION

### CANCELLATION OF CERTIFICATES OF APPROVAL No 0/100

This Certificate replaces Cancellation Certificate No 0/100 issued on 9 February 1979 which should be destroyed.

This is to certify that the Certificates of Approval listed below (including Variation Certificates) will expire in respect of new instruments on 1 January 1980 except for those marked with an asterisk which will expire on 31 December 1980.

Instruments which were verified on or before 31 December 1979 (31 December 1980 for those marked with an asterisk) may, with the concurrence of the State or Territorial verifying authority, be modified after those dates in accordance with the Certificate of Approval listed and any variation which was applicable at 31 December 1979; for example, an instrument which was verified in the imperial system of units prior to 1 January 1980 may be modified to the metric system of units after 31 December 1979 if an approval for metric conversion of the pattern and variants of the instrument applied at 31 December 1979; or an instrument which was verified, say, without a taring device prior to 1 January 1980 (or 1 January 1981) may be modified to include a taring device after 31 December 1979 if an approval for such modification applied at 31 December 1979.

After 31 December 1979 (31 December 1980 for those marked with an asterisk) new instruments conforming to the listed Certificates will not be acceptable for verification; such instruments should be submitted to the National Standards Commission for re-examination, approval and the issue of a new Certificate.

Signed

Executive Director

## NATIONAL STANDARDS COMMISSION

### CANCELLATION OF CERTIFICATES OF APPROVAL No 0/100

This is to certify that the Certificates of Approval listed below (including Variation Certificates) will expire on 1 January 1980 in respect of new instruments.

Instruments which were verified on or before 31 December 1979 may, with the concurrence of the State or Territorial verifying authority, be modified after that date in accordance with the Certificate of Approval listed and any variation which was applicable at 31 December 1979; for example, an instrument which was verified in the imperial system of units prior to 1 January 1980 may be modified to the metric system of units after 31 December 1979 if an approval for metric conversion of the pattern and variants of the instrument applied at 31 December 1979; or an instrument which was verified, say, without a taring device prior to 1 January 1980 may be modified to include a taring device after 31 December 1979 if an approval for such modification applied at 31 December 1979.

After 31 December 1979 new instruments, conforming to the listed Certificates, will not be acceptable for verification; such instruments should be submitted to the National Standards Commission for re-examination, approval and the issue of a new Certificate.
