DESCRIPTION OF PATTERN

The pattern is a modification of the Victoria Model GW30 partly self-indicating counter machine of 30 lb capacity (see Figure 1) approved in the State of New South Wales, fitted with weight charts of capacity 2 lb by $\frac{1}{4}$ oz graduations and, on the vendor's side, with a chart and indicator for the computation of prices in shillings and pence.

The pattern is an equal-armed instrument of the inverted Roberval type. Movement of the lever is transmitted by means of a steel ribbon to a pendulum-resistant mechanism to which are attached two indicators, one on the purchaser's side and the other on the vendor's side.

The modification consists of the fitting of a price-computing chart and indicator for price rates from 11 to 140 cents per pound on the vendor's side, the rows of computed prices and price rates being coloured alternately yellow and white. The chart and indicator are each marked "GHB 8" (see Figure 2).

DESCRIPTION OF VARIANTS

1. Having the chart and indicator fitted to other State-approved instruments.

GENERAL NOTES

Notice of approval of the pattern and variant described in this Certificate was given in Memorandum of Approval No 119 dated 3rd May, 1968.
