DESCRIPTION OF PATTERN

The pattern is a modification of the Victoria Model GW4 self-indicating counter machine of 4 lb capacity (see Figure 1) approved in the States of New South Wales, Queensland and Victoria, fitted with weight charts of 4 lb by  $\frac{1}{2}$  oz graduations and, on the vendor's side, with a chart and indicator for the computation of prices in shillings and pence.

The pattern is an instrument of the inverted Roberval type. Movement of the lever is transmitted by means of a steel ribbon to a pendulum-resistant mechanism to which are attached two indicators, one on the purchaser's side and the other on the vendor's side.

The modification consists of the fitting of a price-computing chart and indicator for price rates from 1 to 114 cents per pound on the vendor's side, the rows of computed prices being coloured alternately yellow and white. The chart and indicator are each marked "GHB 9" (see Figure 2).

DESCRIPTION OF VARIANTS

1. Having the chart and indicator fitted to other State-approved instruments.

GENERAL NOTES

Notice of approval of the pattern and variant described in this Certificate was given in Memorandum of Approval No 125 dated 14th June, 1968, as amended by Erratum Memorandum dated 18th July, 1968.
