NATIONAL STANDARDS COMMISSION

TECHNICAL SCHEDULE No 9/4

Pattern: Fibreglass Vehicle Tank

Submitter: Reinforced Plastics Pty Ltd,  
Fairbank Road,  
Clayton, Victoria, 3168.

Date of Approval: 17 May 1974

The approval is limited to the one instrument Serial No 1145.

The service period is twelve months.

The instrument conforming to this approval shall be marked "NSC No 9/4".

Description:

The pattern is of a single-compartment full-capacity measure to contain a quantity of 4425 gallons when filled to the capacity mark on the inside surface of the front manhole, under conditions such that the front manhole is higher than the rear of the tank.

The tank, which is of internal dimensions 35 ft 1 in long and elliptical cross-section 6 ft wide and 4 ft 4 in high, is constructed of an inner and outer wall of fibreglass with stiffening ribs and insulation between the walls.

This approval includes the tank being converted to metric units, in which case the capacity mark will be at not more than 20 120 litres.

Special Tests:

A visual inspection of the tank should not show any signs of cracking.
