Supplementary Certificate of Approval

NMI S807

Issued by the Chief Metrologist under Regulation 60
of the
National Measurement Regulations 1999

This is to certify that an approval for use for trade has been granted in respect of the instruments herein described.

Square AU model Square Point of Sale (POS) System

submitted by Square AU Pty Ltd
Lv 8, 376-390 Collins Street
Melbourne VIC 3000

NOTE: This Certificate relates to the suitability of the pattern of the instrument for use for trade only in respect of its metrological characteristics. This Certificate does not constitute or imply any guarantee of compliance by the manufacturer or any other person with any requirements regarding safety.

This approval has been granted with reference to document NMI M 7, *Pattern Approval Specifications for Point of Sale Systems*, dated June 2012.

This approval is subject to review at the decision of the Chief Metrologist in accordance with the conditions specified in the document NMI P 106.

DOCUMENT HISTORY

Rev	Reason/Details	Date
0	Pattern and Variant 1 approved – interim certificate issued	25/03/2021
1	Pattern amended (validity date) – interim certificate issued	11/05/2022
2	Variant 2 approved – certificate issued	12/01/2023

CONDITIONS OF APPROVAL

General

Instruments purporting to comply with this approval shall be marked with pattern approval number 'NMI S807' and only by persons authorised by the submitter.

It is the submitter's responsibility to ensure that all instruments marked with this approval number are constructed as described in the documentation lodged with the National Measurement Institute (NMI) and with the relevant Certificate of Approval and Technical Schedule. Failure to comply with this Condition may attract penalties under Section 19B of the National Measurement Act and may result in cancellation or withdrawal of the approval, in accordance with document NMI P 106.

Special

Certain aspects of this instrument (in particular transaction record printing formats) are able to be configured by the user. Whilst NMI believes that acceptable formats can be achieved for typical basic sales modes, it is also possible for the instrument to be configured to produce unacceptable formats, and use of some formats may be inappropriate for different sales modes. It is the responsibility of the user to ensure that acceptable and appropriate formats are used in any particular situation.

Signed by a person authorised by the Chief Metrologist
to exercise their powers under Regulation 60 of the
National Measurement Regulations 1999.

TECHNICAL SCHEDULE No S807

1. Description of Pattern

approved on 25/03/2021

A Square AU model Square Point of Sale (POS) system to provide certain additional facilities for transactions when interfaced to compatible (#) NMI-approved measuring instruments granted with reference to document NMI M 7.

1.1 Key Features

- The system provides point of sale arrangements for a CAS model PD-II self-indicating non-automatic weighing instrument (approval NMI 6/4C/237) or other compatible (#) NMI-approved measuring instruments.
 - The system receives measurement data from the output interface of the approved measuring instrument and computes prices using a product look up (PLU) facility.
 - The system computes total price for multiple items including non-measured items and is approved for use for transactions direct to the public.
 - Manually entered measurement data shall be indicated as such on a printed transaction record.
 - The POS controllers may be connected in a network to share common PLU data, and to accumulate and retrieve management information.
- (#) 'Compatible' is defined to mean that no additions/changes to the hardware/software specified in this approval are required for satisfactory operation of the system.

Note: The POS system is NOT able to apply a preset tare value.

1.2 System Description

The Square AU model Square point of sale (POS) system (Figure 1) comprises:

(i) POS Controller

The Square AU model Square POS controller comprises a Square Terminal that operates an Android based operating system running Square POS software version 4.xx software. The software version number is displayed by opening the Support menu and selecting About.

The Square Terminal is connected to the compatible NMI-approved measuring instruments using a Square Terminal USB hub and Serial Port adapter.

(ii) Electronic Indications

Indications shall satisfy the requirements of document NMI M 7, *Pattern Approval Specifications for Point of Sale Systems*.

The Square Terminal POS controller has an integral touch sensitive display to provide an indication for the operator (Figure 2).

Information additional to that required by document NMI M 7, including totalisation details and product images, may also be indicated.

Note: There is no NMI M 7 compliant customer display fitted to the POS system.

(iii) Printing Devices

Transaction records shall satisfy the requirements of document NMI M 7, *Pattern Approval Specifications for Point of Sale Systems*.

The Square Terminal POS controller includes an integral receipt printer to provide a transaction record printing facility. A typical record is shown in Figure 3.

(iv) Additional System Facilities

In addition, the system may include other facilities including point of sale cash drawers, magnetic card and/or barcode reader and electronic funds transfer (EFT), etc. The facilities shall not interact with the system in a way that would cause an incorrect indication of the measured quantity or price.

1.3 Verification Provision

Provision is made for the application of a verification mark.

1.4 Descriptive Markings

The POS controller is marked in a clear and permanent manner, in one location, with the following information:

Submittor's name or mark
Serial number or other unique identifier
Pattern approval number	NMI S807

2. Description of Variant 1

approved on 25/03/2021

2.1 System Description

(i) POS Controller

With the Square AU model Square POS operating on an Apple iOS or Android devices that are equivalent (*) to the Square Terminal of the pattern described in **1.2 (i) POS Controller**. The POS Controller of this variant operate Square POS software version 5.xx. The software version number is displayed by opening the Support menu and selecting About.

(ii) Electronic Indications

Indications shall satisfy the requirements of document NMI M 7, *Pattern Approval Specifications for Point of Sale Systems*.

The POS controller of this variant has an integral touch sensitive display to provide an indication for the operator that is equivalent (*) to the integrated display of the pattern described in **1.2 (ii) Electronic Indication**

Note: There is no NMI M 7 compliant customer display fitted to the POS system.

(iii) Printing Devices

Transaction records shall satisfy the requirements of document NMI M 7, *Pattern Approval Specifications for Point of Sale Systems*.

The POS controller of this variant must be connected to a printing device that is equivalent (*) to the integrated printer of the pattern described in **1.2 (iii) Printing Devices**

(*) 'Equivalent' is defined to mean other proprietary equipment of the same or better specifications requiring no changes to the software specified in this approval for satisfactory operation of the system.

2. Description of Variant 1

approved on 12/01/2023

A Square AU model Square Register point of sale (POS) system (Figure 4).

2.1 System Description

(i) POS Controller

With the Square AU model Square Register operates an Android based operating system running Square POS software version 5.xx.xxx software

(ii) Electronic Indications

Indications shall satisfy the requirements of document NMI M 7, *Pattern Approval Specifications for Point of Sale Systems*.

The Square Register controller of this variant has an integral touch sensitive display to provide an indication for the operator (Figure 5).

The Square Register controller of this variant also has an integral touch sensitive display to provide an indication for the customer (Figure 6). The integral customer display can be detached and connected to the POS controller as a remote display (Figure 7).

(iii) Printing Devices

Transaction records shall satisfy the requirements of document NMI M 7, *Pattern Approval Specifications for Point of Sale Systems*.

The POS controller of this variant must be connected to a printing device that is equivalent (*) to integrated printer of the pattern described in **1.2 (iii) Printing Devices**

(*) 'Equivalent' is defined to mean other proprietary equipment of the same or better specifications requiring no changes to the software specified in this approval for satisfactory operation of the system.

(iv) Additional System Facilities

In addition, the system may include other facilities including point of sale cash drawers, magnetic, electronic chip (EMV), or contactless (RFID) card reader and electronic funds transfer (EFT), etc. The facilities shall not interact with the system in a way that would cause an incorrect indication of the measured quantity or price.

TEST PROCEDURE No S807

The POS system shall be tested in addition to any tests specified in the approval documentation for the measuring instrument/s to which the POS system is connected, as appropriate

The POS system shall be tested in the normal operational mode of the instrument and device, not in 'training mode' or any other management mode.

Maximum Permissible Error

The maximum permissible error for price computation is ± 0.5 cent.

TESTS

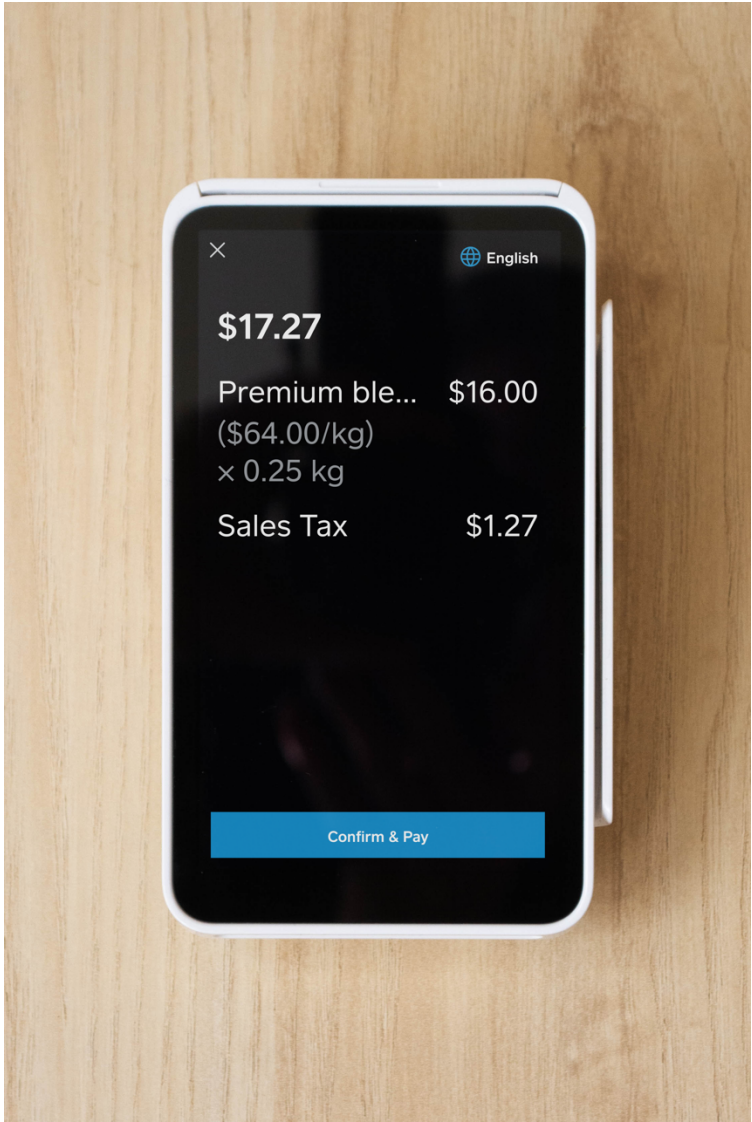

1. Check the software version number/s.
2. Check that the POS system faithfully reproduces the measurement data in the same units and scale interval as the connected approved measuring instrument.
3. Check that the system performs correct price computation, and computes and indicates a correct unrounded subtotal. For cash payment methods, check that any rounding calculation is correct.
4. Manually enter some pre-determined measurement data and ensure that the printed transaction record clearly indicates the transaction as such.
5. For network systems check to ensure that the measurement data printed on the transaction record is correctly reproduced.
6. Ensure that electronic indications and printed information are in accordance with document NMI M 7.
